Natures Storyteller
Barbara Olenyik Morrow

Gene Stratton-Porter's love of birds, moths, flowers and stories is packaged neatly in this biography by Barbara Olenyik Morrow. Stratton-Porter's unconventional rise to famous Hoosier is documented through her own photos & correspondence. Morrow captures Stratton-Porter's dedication to nature and leads readers down the path of Stratton-Porter's life through both her fiction works and her nature titles. *Nature's Storyteller* also highlights much of Stratton-Porter's conservation work and how it has impacted the Indiana we know today. Charming tribute to a fascinating Hoosier.
