

PRESS RELEASE
FOR IMMEDIATE RELEASE

Applications for the 2016 Indiana Propane School Bus Grant

INDIANAPOLIS (September 13, 2016) — The [Indiana Office of Energy Development \(OED\)](#) today announced that Indiana public school corporations that own their own buses can begin applying for a share of \$150,000 through the OED's 2016 [Indiana Propane School Bus \(PSB\) grant program](#).

This is OED's second grant round specifically dedicated to propane school buses. Schools can benefit from propane school buses in a variety of ways, including decreasing schoolchildren's exposure to harmful emissions, lowering maintenance costs through the use of a cleaner burning fuel and increasing fuel diversity.

"We're excited to open applications for this propane school bus grant program," said OED Director Tristan Vance. "Projects such as these can reduce costs, improve fueling options and utilize domestic energy resources."

Applications for the 2016 PSB grant program can be mailed to grants@oed.in.gov beginning today through October 19, 2016. Program guidelines are available at www.in.gov/oed/2733.htm.

The winning recipients will receive between 50 percent to 100 percent of the incremental cost difference between a new propane-powered school bus and a diesel or gasoline-powered school bus. OED intends for winning recipients to track their miles driven, fuel usage and cost savings for one year after the buses are first put in use. This data can help the recipients and their communities and peers to better understand their fueling options.

PSB projects must involve the purchase of a minimum of two new propane school buses. Applicants must have access to propane fueling infrastructure or show that they will have access if they are awarded a grant. OED expects applicants to demonstrate their need for this project and how this project will benefit the applicant's school corporation. While cost sharing of the incremental cost is not a requirement for applicants, Vance said special consideration is given to applications that leverage additional funding or for those which have in-kind funding.

Those selected to receive a 2016 PSB will be notified by letter and email at the end of November 2016.

About the Indiana Office of Energy Development

The [Indiana Office of Energy Development \(OED\)](#) was established to shepherd the state's energy plan. OED focuses on the development and implementation of comprehensive planning for the state that utilizes all of Indiana's energy resources and supports a strong, dynamic and growing economy. OED coordinates state energy policy with executive branch agencies, houses energy-related programs and works to support a strong, comprehensive, coordinated energy plan for Indiana. The

office also administers grant programs funded by the U.S. Department of Energy. These grants promote the use of alternative power and fuels, energy efficiency and public education on energy issues in Indiana.
