

# Indiana Recycled Product Showroom

## Buy Recycled!

Creating a strong market for recycled products is key to completing the recycling process or "closing the loop." Consumers close the loop when they purchase products made from recycled materials. The following list presents just a sampling of products that are made with recycled content:

Aluminum products  
Carpeting  
Glass containers  
Plastic containers

Toner cartridges  
Paper products  
Steel products

When purchasing items for your business, school, or home, check to see if they are made with recycled content. Large corporations such as Walmart, Target, Lowes, Home Depot, Office Depot, Office Max, and many others routinely stock recycled paper, toner cartridges, bags, packaging, containers, lumber, and other recycled content products.

The Indiana Recycled Product Showroom is published to assist businesses in the state of Indiana to market their recycled products. In addition, it is intended to serve as a resource for buyers to encourage the purchase of products manufactured in Indiana that use waste generated in Indiana as a raw material. By supporting these manufactures, recyclable materials become a commodity to these Indiana companies.

### Disclaimer

The state of Indiana does not endorse any company listed in the Indiana Recycled Product Showroom. Companies that are not listed were not omitted intentionally. If you are an Indiana recycled-product manufacturer or distributor and would like to be included in the showroom, or to update listed information please contact the Recycling Market Development Program at:
