Honorable Members
Northwestern Indiana Regional Planning Commission

Dear Commissioners:

Formal Transmittal

We are pleased to submit the Comprehensive Annual Financial Report (CAFR) of the Northwestern Indiana Regional Planning Commission (Commission) for the fiscal year ended December 31, 2014.

This financial report has been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP) by the Commission's management and staff that are responsible for and affirm the adequacy of the material presented in this report based upon a comprehensive framework of internal control that has been established for this purpose. Since the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements. We believe the Commission's internal controls adequately safeguard assets and provide reasonable assurance of the proper recording of financial transactions.

To the best of our knowledge and belief, the information as presented herein is accurate in all material respects. The information is presented in a manner designed to set forth fairly the financial position and results of operations of the Commission as measured by the financial activity of the various funds. All disclosures necessary to enable the reader to gain the maximum understanding of the Commission's financial affairs have been included.

The Commission's financial statements have been audited by the Indiana State Board of Accounts as established by Indiana General Assembly to review and perform the external audit of units of governments in Indiana. The goal of the independent audit is to provide reasonable assurance that the financial statements presented here for the fiscal year ended December 31, 2014, are free of material misstatement. In addition, the Commission is required to undergo a Single Audit of Federal programs conducted under the provisions of OMB Circular A-133. The Commission has been issued an unqualified opinion. The independent auditor's report is located at the front of the financial section of this report.

GAAP also requires that management provide a narrative introduction, overview and analysis to accompany the basic financial statements. The efforts to establish this narrative are presented in the form of Management's Discussion and Analysis (MD&A) which can be found immediately following the independent auditor's report.

Profile of the Government

The Commission is nestled in the northwest corner of Indiana between the metropolitan influences of Chicago and Indianapolis. Northwest Indiana, shaped by sand and steel, draws on a rich history of economic accomplishment and unmatched natural beauty.

The Commission was originally called the Lake-Porter County Regional Transportation and Planning Commission and was created by state statute in 1965 defined as a multi-purpose, area-wide planning agency. A 1973 amendment provided the Commission with its current name and gave LaPorte County the option to join the Commission. In 1975, Indiana Governor Otis T. Bowen re-designated the Commission as the Metropolitan Planning Organization (MPO) for the two-county region. Then in 1979 LaPorte County exercised their option to join which made the Commission a three county region.

In 2003, significant and major changes were made to the Commission's functions and appointing authorities in a law passed by the Indiana General Assembly and signed by the Governor. The new legislation defined the Commission as a council of governments (COG) and designated regional planning responsibilities in the areas of economic development, environmental resources, and transportation. Reorganizing the Commission as a council of governments increased the size of the membership from 39 to 51. The new seats included representation from all 41 cities and towns from within the three-county region, the county surveyor from each county, one county council member and county commissioner from each member county, and one member appointed by the Governor. The legislation also specified that only elected officials could be appointed to serve on the Commission. In 2007, the legislation was amended to add trustees of a township with a population over 8,000 which do not contain a municipality. This amendment added two more voting members, making the total Commissioner Board 53. The Indiana Department of Transportation (INDOT) and a public transit operator representative selected by the operators continue to participate in vital roles on the Commission Board as non-voting members.

The Commission is responsible for its annual budget. The budget for governmental funds is adopted on a basis consistent with accounting principles generally accepted in the United States of America. These funds include the Commission's general fund, its special revenue funds, and its one capital projects fund. A proposed budget for the ensuing year is submitted to the Commission by the Executive Director. This usually occurs at the fourth quarterly meeting of the Commission which is typically held in October. The Commission may vote to adopt the budget at this meeting, or may call a special meeting to take action on the budget.

The budget as adopted by the Commission is organized by object class categories. Major object class categories represent the legal level of control. Amendments to the adopted budget may be made only by the Commission at any regular meeting of the Commission or at any special meeting of the Commission called to consider the budget. The Commission has established a Finance and Personnel Committee composed exclusively of Commission members appointed by the Chair. This Committee exercises financial oversight over Commission operations and establishes more detailed accounts. Amounts presented in the financial statements are the final budget amounts for the year, as legally amended.

The Commission's planning area is comprised of the participating counties of Lake, Porter and LaPorte in Indiana. This area has a population of 771,815 as of the 2010 Census, covers 1520 square miles in area, and includes forty-one municipalities and forty-four townships. The Commission has received numerous designations from state and federal agencies for programs which encourage or require area-wide planning in such fields as economic development, transportation, environmental protection and comprehensive planning.

Metropolitan Planning Organization Functions

The Commission also functions as the Metropolitan Planning Organization (MPO) for northwest Indiana. Planning is carried out in accordance with the federal transportation planning requirements of the Moving Ahead for Progress in the 21st Century Act (MAP-21), the Clean Air Act Amendments of 1990, Title VI of the Civil Rights Act of 1964, and their predecessor acts. The Commission works with federal and state

transportation departments and local transit operators to prioritize and fund regional projects, making the region well-positioned to capitalize on some of the most strategic and critical links in our nation's transportation system. This is accomplished through the Transportation Improvement Program (TIP), a short-term (four-year) list of federally funded surface transportation investment projects. Surface transportation projects include those for public transit, local and state highways and bicycle/pedestrian projects. The Commission adopts a new TIP every other year. In between those years, revisions are made to the TIP by way of amendments which are presented to the Transportation Policy Committee for approval and ultimately acted upon by the Commission.

The first three-county comprehensive regional plan was adopted by the Commission in June 2011 after an intensive 30-month planning process. The process included an extensive and unprecedented public participation effort beginning with a regional forum in December, 2008 that attracted over 500 participants from the three-county area. It was the most demographically balanced function of its kind ever held in the three-county region. The forum was followed by over 30 workshops and meetings in 2009 and 2010 which produced the Plan's vision statement, goals and objectives; regional public policy recommendations; and implementation strategies.

The 2040 Comprehensive Regional Plan (CRP) places the Commission in a new role in the region with respect to planning and implementation. The Commission is being called upon to assist local governments and regional stakeholders to develop integrated land use and transportation strategies, support economic development efforts, help realize land conservation and a protected green infrastructure, and to do so in a manner that recognizes and supports social equity and environmental justice. The breadth of the CRP planning initiatives suggests a broader role for the Commission in realizing the future aspirations of northwest Indiana. The 2040 CRP lays the foundation and establishes the program for how the Commission will assist northwest Indiana in realizing its vision. Today, we have the advantage to present a unique challenge in an unpredictable world – to shape our own future and to sustain a diverse quality of life.

Following adoption of the 2040 CRP, the Commission created an implementation and monitoring process. It includes committees of stakeholders who have and will continue to help identify implementation actions, monitor progress, and recommend changes or new policies. This is an innovative approach for a Commission planning initiative and will make the regional decision-making process more transparent and accessible.

The 2040 CRP took the top honor in receiving the prestigious 2013 Daniel Burnham Award for a Comprehensive Plan from the American Planning Association (APA). The Daniel Burnham Award recognizes a comprehensive plan that advances the science and art of planning. The award is named for America's most famous planner, Daniel Burnham, for his contributions to the planning profession and to a greater awareness of the benefits of good planning. This award is an exceptional national honor, representing the best in category among nationwide submittals.

This recognition is accompanied by the National Association of Regional Councils' 2010 and 2012 Outstanding Achievement Awards for the planning process and for the plan respectively; the 2009 Indiana Metropolitan Planning Organization award for Outstanding Public Involvement; and the Indiana Chapter of the APA's awards - in 2010 for Outstanding Community Initiative, in 2012 for Outstanding Plan, and in 2014 for Outstanding Best Practice for the Plan's implementation strategy.

Since late 2014, the Commission has been engaged in the process of preparing an update to the 2040 Plan called the 2040 CRP Update Companion. The Commission conducted a series of focused listening sessions throughout the region in the fall of 2014. These sessions included several areas of interest, primarily including public transportation, the environment and freight.

In 2015, the draft was prepared in March, for a public review period, which concluded at the end of April. The Update Companion is scheduled to be acted on by the Commission in May. This document will provide a snapshot of major planning initiatives undertaken, and changes in regional demographics since the release of the 2040 CRP in 2011. The Update Companion will not represent a significant overhaul of

the planning processes that led to the creation of the 2040 CRP. The goals, objectives and implementation strategies from that Plan remain consistent with the regional vision, and thus no additional work was necessary to revise these. The Update Companion will recognize a few new projects that will be included in an updated TIP and have analyzed for air quality conformity with clean air standards.

In 2014, the Commission launched its “Creating Livable Centers” program, implementing key goals of the CRP to enhance the vitality and viability of the region’s communities. The innovative nature of this program was recognized with a 2014 award from the Indiana Chapter of the American Planning Association.

The Commission provides several support services to governmental bodies within northwestern Indiana. These services are provided through the combined efforts and utilization of financial resources obtained directly through the appropriations made by participating counties.

Provided Services

Federal Transit Administration

Since 1975, the Commission has acted as the designated direct recipient for Federal Transit Administration (FTA) funding. The Urban Mass Transportation Administration of the U.S. Department of Transportation (UMTA), the forerunner of FTA made federal funds available to human service providers who were acting as the public transportation providers in areas where no government supported public transit existed. Since there were many small agencies applying for small grants, UMTA/FTA approached the Commission to become the direct recipient on behalf of these small operators.

As required by FTA, the Commission provides oversight and technical assistance for seven subrecipients: City of East Chicago, City of LaPorte, City of Valparaiso, North Township Dial-a-Ride, Opportunity Enterprises, Porter County Aging and Community Services, and South Lake County Community Services. These subrecipients operate various services such as fixed route with complementary paratransit and demand response service within portions of northwest Indiana, as well as commuter service to Chicago.

The Commission has a dual role purpose in the FTA grant process. The first role is that of the MPO that requires the Commission to include all grant monies necessary for transit operations including equipment to be included in the TIP. This process is done through an operators’ round table meeting, from which the results are then included in the TIP and taken to the Transportation Policy Committee for action and subsequently submitted to the Commission for approval.

The second role is that of grant management. The Commission is responsible for meeting grant responsibilities and reporting requirements as mandated by FTA. In administering FTA funded projects, the Commission must monitor grant-supported activities to ensure compliance with applicable Federal requirements. This includes the administration and management of the grant in compliance with the Federal regulations, Grant Agreement, and applicable FTA circulars. The Commission is also responsible for funds that “pass through” to the subrecipients.

Every three years, FTA performs a triennial review to examine the Commission’s performance and adherence to current FTA requirements and policies. The review process currently examines 17 areas of compliance. In addition to helping evaluate the Commission, the review gives FTA an opportunity to provide technical assistance on the latest FTA requirements and aids FTA in reporting to the Secretary of the U.S. Department of Transportation, Congress, other oversight agencies, and the transit community. The most recent triennial review of the Commission was conducted by FTA in September, 2014. The next triennial for the Commission is scheduled for 2017.

Revolving Loan Fund Program

Another service the Commission provides is administration of the LaPorte Revolving Loan Fund. The revolving loan fund program is one of several tools of the U.S. Department of Commerce, Economic Development Administration (EDA), available to assist areas with high unemployment. A revolving loan fund is a pool of money used by an eligible recipient for the purpose of making loans to achieve certain economic benefits. As the loans are repaid by borrowers, the money is returned to the fund to make new loans. In that manner, the fund becomes an ongoing or revolving financial tool. Due to the high unemployment rate in the region in the mid 1980's, the Commission was chosen to administer the revolving loan fund given its neutrality in the Region and its capacity to run the program. In 1987, the Commission established the LaPorte Revolving Loan fund to account for the financial resources used for the revolving loan fund program in LaPorte County.

In 2014, the Commission procured the professional services of the Regional Development Company to assist in marketing, all aspects of the loan process, meet with LaPorte County Economic Development staff, and update the management plan with the desired outcome of making new loans.

Other Programs

The Commission provides staff services on a continuing basis, via contractual relationships, to several governmental organizations serving northwestern Indiana. These include the Kankakee River Basin Commission and the Lake Michigan Marina and Shoreline Development Commission. Each of these organizations is an independent governmental unit. In addition to providing services to these agencies, the Commission also provides services on a contractual basis to other governmental units (such as cities and towns) within the region. Most of these other arrangements are for the undertaking of specific projects or programs, such as the preparation of a plan or study of some aspect of the community's development.

Other services are provided utilizing revenues received through specific federal and state grants, contracts or agreements. These services usually involve the provision of specific types of services, often in the form of studies or demonstration projects, which benefit local governments in the region. Often these programs require a matching share of resources from the Commission. This matching share is usually derived from the county appropriations. Still other types of services are provided for through contractual or other arrangements with specific local governmental bodies.

Information Useful in Assessing the Commission's Economic Condition

Northwest Indiana is noted for its heavy industry. Gary, Portage, Burns Harbor and East Chicago are home to major steel mills, including the largest North American facilities for both U.S. Steel (Gary Works) and ArcelorMittal (Indiana Harbor). Whiting and Hammond are home to the largest oil refinery in the Midwestern U.S., operated by BP. Other industrial outputs include fabricated metals, transportation equipment, and food products.

The steel industry is still the Region's biggest economic producer, while health care and social services are the Region's largest industry employer. Although the steel industry has seen dramatic improvement in productivity resulting in less jobs, those jobs still pay higher wages than those in other industries. According to the 2010 IMPLAN, one steelworker job creates approximately four other jobs as those steelworkers and their families spend their earnings. The combination of an improving job market (unemployment rate of 5.7% January, 2015), pent-up consumer demand; less drag from U.S. Government policies and a brighter global outlook boost optimism from the business community for the rest of 2015.

As noted on the Region Indicator Scorecard below, the Commission's region has seen significant progress in recovering from the 2008 recession. The gross regional product has seen a 13% increase from the third quarter of 2011 to the first quarter of 2013. Other promising signs of recovery are the increase in overall asessed value, increase in the per capita personal income and an increase in private sector sales. These increases mean more people are investing in the Region.

REGION INDICATOR SCORECARD

INDICATOR	Nov-11	Apr-13	Dec-13
Gross Regional Product	\$29.3 B	\$33.2 B	\$39.44 B
Private Sector Sales	41 B	43 B	N/A
Household Earnings	17.3 B	19.2 B	19.144 B
Tax Base - Assessed Value	\$33.3 B	\$39.5 B	\$39.062 B

Formation of the EDD

To assist the three county region of Lake, Porter, and LaPorte in developing and implementing economic development programs, the Commission and the Northwest Indiana Forum (Forum) came together to create the Northwest Indiana Economic Development District (NWIEDD) as a Not-For-Profit Corporation in 2009. In 2014, the NWIEDD changed bylaws to become an autonomous self-appointing board. The NWIEDD is continuing to pursue designation of district status that meets the Economic Development Administration (EDA) requirements noted in 13 CFR part 304 in order to receive grant funds to implement the Comprehensive Economic Development Strategy (CEDS) projects. This designation will allow the three county region to be eligible to receive federal grants from EDA. Currently the NWIEDD maintains and implements the CEDS plan. The CEDS represents the confluence of local public and private interests and is intended to be a roadmap to a bright future in northwest Indiana. The deliberation and forethought incorporated in the CEDS is designed to help create jobs, foster a more stable and diversified economy, and improve quality of life. It provides a mechanism to coordinate the efforts of individuals, organizations, local governments, and private industry concerned with economic development.

The Commission

The Commission is funded primarily by federal grant dollars either directly or passed through state agencies. A continuing funding concern is the availability of federal funds for planning activities.

The required federal grant local match comes primarily from the mandated county contribution amount which is based on population according to most recent decennial census. The Commission does not generate its own source revenue.

The 2014 fiscal year continued to be another challenging year, and yet there were significant accomplishments made by the Commission as indicated in the Management's Discussion and Analysis highlights. The Commission continues to find additional sources of revenue while trying to minimize expenditures. The Commission is poised to address its future in the midst of these challenges.

Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a **Certificate of Achievement for Excellence in Financial Reporting** to the **Northwestern Indiana Regional Planning Commission** for its comprehensive annual financial report for the fiscal year ended December 31, 2013. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable program requirements.

A Certificate of Achievement for Excellence in Financial Reporting is valid for a period of one year only. The Commission believes its current report continues to meet the Certificate of Achievement Program requirements, and it is being submitted to GFOA to determine its eligibility for another certificate.

The preparation of this report could not have been accomplished without the persevering service of the following individuals: Allen Hammond, John Smith, and Matt Saltanovitz. Special thanks go to Chief Accountant Kelly Wenger, whose assistance made this report possible.

The Commission would like to thank Indiana State Board of Accounts and especially Aaron Prybylla, Cynthia David, and Sara Hancock, for the timely and thorough completion of the independent audit report and for their special effort in the development of the 2014 Commission CAFR.

Sincerely,

Angie Hayes

INDEPENDENT AUDITOR'S REPORT

TO: THE OFFICIALS OF THE NORTHWESTERN INDIANA REGIONAL PLANNING
COMMISSION, LAKE, PORTER, AND LAPORTE COUNTIES, INDIANA

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities and each major fund of the Northwestern Indiana Regional Planning Commission (Commission), as of and for the year ended December 31, 2014, and the related notes to the financial statements, which collectively comprise the Commission's basic financial statements as listed in the Table of Contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Commission's internal control. Accordingly, we express no such opinion. An audit includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that our audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

INDEPENDENT AUDITOR'S REPORT
(Continued)

Opinions

In our opinion, based on our audit, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund of the Commission, as of December 31, 2014, and the respective changes in financial position, thereof and for the year then ended, in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis and Budgetary Comparison Schedules, as listed in the Table of Contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Commission's basic financial statements. The accompanying Schedule of Expenditures of Federal Awards, as required by the U.S. Office of Management and Budget Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations (Circular A-133), Budgetary Comparison Schedule – Transit Capital, and the Introductory and Statistical Sections are presented for purposes of additional analysis and are not required parts of the basic financial statements.

The Schedule of Expenditures of Federal Awards and Budgetary Comparison Schedule – Transit Capital are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedule of Expenditures of Federal Awards and Budgetary Comparison Schedule – Transit Capital are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The Introductory and Statistical Sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

INDEPENDENT AUDITOR'S REPORT
(Continued)

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated June 18, 2015, on our consideration of the Commission's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Commission's internal control over financial reporting and compliance.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING
AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL
STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

TO: THE OFFICIALS OF THE NORTHWESTERN INDIANA REGIONAL PLANNING
COMMISSION, LAKE, PORTER, AND LAPORTE COUNTIES, INDIANA

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities and each major fund of the Northwestern Indiana Regional Planning Commission (Commission), as of and for the year ended December 31, 2014, and the related notes to the financial statements, which collectively comprise the Commission's basic financial statements and have issued our report thereon dated June 18, 2015.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Commission's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Commission's internal control. Accordingly, we do not express an opinion on the effectiveness of the Commission's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the Commission's financial statements will not be prevented, or detected and corrected, on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING
AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL
STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*
(Continued)

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Commission's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

MANAGEMENT'S DISCUSSION AND ANALYSIS (MD&A)

The Commission offers readers this narrative overview and analysis of the financial activities for the fiscal year ended December 31, 2014. Readers are encouraged to consider this information in conjunction with additional information furnished in the basic financial statements and notes to the financial statements to enhance understanding of the Commission's financial performance.

Financial Highlights

- The assets of the Commission exceeded its liabilities at the close of the fiscal year by \$5,017,264 (net position). Of this amount, \$1,269,166 (unrestricted net position) may be used to meet the Commission's ongoing obligations to citizens and creditors.
- Approximately 98.2% of the Commission's general fund balance, \$1,350,451, constitutes an unassigned fund balance, which is available for spending at the Commission's discretion.
- The Commission continues to experience a positive cash flow and has not, therefore, had to execute the board approved line of credit.
- The Commission invests in capital assets for its governmental activities. All capital assets owned by the Commission are free of debt.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Commission's basic financial statements. The Commission's basic financial statements comprise of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-Wide Financial Statements

The *government-wide financial statements* are designed to provide readers with a broad overview of the Commission's finances, in a manner similar to a private-sector business.

The *statement of net position* presents information on all the Commission's assets, liabilities, and deferred inflows/outflows of resources, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Commission is improving or deteriorating.

The *statement of activities* presents information showing how the Commission's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods.

Both of the government-wide financial statements distinguish functions of the Commission that are principally supported by intergovernmental revenues (government activities). The Commission does not have business type activities.

Fund Financial Statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities. The Commission, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Commission are governmental funds.

Governmental Funds

Governmental Funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

General Government Revenues

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The Commission maintains four individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for all four funds.

The Commission adopts an annual budget for the four individual governmental funds. A budgetary comparison statement has been provided for all four funds to demonstrate compliance with the budget.

Notes to the financial statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Government-Wide Overall Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the Commission, assets exceed liabilities by \$5,017,264 at the year ending December 31, 2014.

The Commission's Net Position

The following table reflects a summary of Net Position compared to the prior year.

	2014	2013
Current and Other Assets	\$ 2,823,878	\$ 2,655,113
Capital Assets	<u>3,230,550</u>	<u>4,286,809</u>
Total Assets	\$ 6,054,428	\$ 6,941,922
Long-term Liabilities	73,156	264,633
Other Liabilities	<u>964,008</u>	<u>862,075</u>
Total Liabilities	\$ 1,037,164	\$ 1,126,708

Total Expenses	<u>\$ 7,442,541</u>	<u>\$ 7,055,264</u>
Changes in net position	(1,005,065)	523,188
Net Position - Beginning, Restated	<u>6,022,329</u>	<u>5,292,026</u>
Net Position - Ending	<u>\$ 5,017,264</u>	<u>\$ 5,815,214</u>

Analysis of Overall Financial Position and Results of Operations

Capital assets are used to provide services to citizens and they are not available for future spending. Approximately 64% of the Commission's net position reflects its investment in capital assets (e.g., machinery, equipment, and vehicles). The Commission does not own any real property or infrastructure. It should be noted that all capital assets owned by the Commission are free of debt and do not require additional resources.

Current and other assets consist mainly of cash, receivables from intergovernmental sources, and interest. Long-term liabilities consist of compensated absences.

The Commission's net position decreased by \$1,005,065 during the current fiscal year. There was a decrease in capital assets of \$1,056,259 due to the change in capital asset policy, removal of obsolete equipment, and the accompanying accumulation depreciation.

Financial Analysis of the Government's Funds

As noted earlier, the Commission uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Funds

The focus of the Commission's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the Commission's financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year the Commission's governmental funds reported combined ending fund balances of \$1,867,999 an increase of \$68,569 in comparison with the prior year. Approximately 72% of this total amount, \$1,350,451, constitutes unassigned fund balance which is available for spending at the government's discretion. The remainder of the fund balance is not available for spending because it has been committed for nonspendable prepaid insurance, \$23,681, and restricted for economic development, \$493,867.

The general fund is the chief operating fund of the Commission. At the end of the current fiscal year, the unassigned fund balance amount of \$1,350,451 is in the Commission's general fund. As a measure of the general funds' liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total general fund expenditures.

The fund balance of the Commission's general fund increased by \$68,569 during the current fiscal year. Key factors in this increase are as follows:

The indirect costs were within budget based on the allocation rate of 70% in the 2014 Cost Allocation Plan. Additionally, more direct salaries were charged to grants than to indirect salaries which increased the amount reimbursed for indirect costs.

Overall revenue increased by \$107,268 and overall expenditures increased \$27,377 from the prior year with a net change of \$79,891.

The LaPorte revolving loan fund accounts for the revolving loan program activities. The fund balance has remained consistent from 2013 with no new funds added or delinquent loan write-offs in 2014. Two loans were paid off by the borrowers which increased the cash in the fund. The

U.S. Department of Commerce, Economic Development Administration, required the Commission to sequester funds as a result of holding excess funds during two or more consecutive reporting periods. The last revolving loan fund loan issued was to St. Andrew's Products in 2010. The sequestered funds still belong to the Commission and can be used to make additional loans but need approval from the Commission's Revolving Loan Fund Administrator at the Economic Development Administration.

The transit operating fund is used to account for the reimbursement of operation expenses for subrecipients providing public transit. The Commission itself does not operate public transit but is the direct recipient for these funds. As expected this fund balance has remained consistent with the 2013 balance.

The transit capital fund is used to account for the purchase of capital equipment and facilities used for public transit. The funding for these purchases is provided by both Federal Transit Administration and the subrecipient operating the capital equipment. The Commission does not cover any costs associated with the purchase of the capital equipment in this fund. In order for the Commission to safeguard the federal interest, the Commission retains title to all federally funded capital equipment. As expected this fund balance has remained consistent with the 2013 balance.

Budgetary Highlights

General Fund

The Commission's general fund is budgeted annually for general operating expenses. During the year there were budget amendments totaling \$279,500 which increased the original budget. The main component of the increase was in the contractual line item for the Bikes on Trains Study in the amount of \$240,000 which was added in July. There were several line items under spent for the year; the Bikes on Trains Study was 15% spent for the year, capital outlays for new accounting software was 57% spent and the environmental programs promotional expenses were 62% spent for the year. These items were under spent mainly due to later project start dates than originally anticipated. The 2014 actual expenditures were 86% of the total final amended budget for the year.

LaPorte RLF Fund

The LaPorte RLF fund is budgeted annually for payment of revolving loan funds to new borrowers. In 2014 there were no new loans written and no budget amendments therefore the budget variance was neutral.

Transit Operating Fund

The transit operating fund is budgeted annually for payment of state and federal funds to the Commission's subrecipients that operate public transit. There were no budget revisions for the year. The budget variance is \$1,396,383 less spent than budgeted. This variance is due to over budgeting of operating projects. Those projects that were under spent for 2014 were CMAQ Operating Assistance for North Township of \$766,758, Preventive Maintenance for South Lake County Community Services \$190,977 and two projects for the City of Valparaiso Capital Cost of Contracting \$192,890 and a marketing project of \$80,000 that was cancelled for the year.

Transit Capital Fund

The transit capital fund is budgeted annually to purchase equipment to operate public transit by the Commission's subrecipients. There were no budget revisions for the year. The budget variance for the year was under spent by \$655,783. The majority of the variance is due to vehicles being budgeted and ordered in 2014 but not arriving until early 2015. These vehicles

account for approximately \$575,578 of the total variance. There were several smaller projects that were cancelled in 2014, public art and security cameras.

Capital Assets

The Commission's investment in capital assets for its governmental activities as of December 31, 2014 amounts to \$3,230,550 (net of accumulated depreciation). This investment in capital assets includes intangibles, vehicles, machinery, office equipment, and computer equipment. The Commission does not own land, buildings, or infrastructure assets.

The total decrease in the Commission's assets for the current fiscal year was \$1,056,259. A detailed note of these capital assets can be found in the Notes to the Financial Statements (Note III E).

Major capital asset events during the current fiscal year included the following:

- The Commission updated the capital asset policy to remove the exception that was made for computer and similar equipment to be included as capital assets and depreciated. This removed \$133,492 from the capital assets.
- There was disposition of outdated and unused machinery and office equipment in 2014 which removed a total of \$393,113 from capital assets.
- AccuFund an accounting software which is being modified for the Commission's benefit was purchased. This software is considered an intangible asset and meets the Commission's capital policy threshold and therefore will be reported in the Commission's financial reports. Due to the nature of the software, AccuFund will have an indefinite useful life and therefore will not be depreciated.

Capital Assets

	<u>2014</u>	<u>2013</u>
Intangible Assets	\$ 10,828	\$ -
Total Intangible Assets	<u>10,828</u>	<u>-</u>
Capital Assets Net of Depreciation		
Vehicle	2,998,008	3,952,619
Transit machinery	217,140	280,068
Office and computer equipment	<u>4,574</u>	<u>54,122</u>
Total Capital Assets Net of Depreciation	<u>\$ 3,219,722</u>	<u>\$ 4,286,809</u>
Total Capital Assets	<u>\$ 3,230,550</u>	<u>\$ 4,286,809</u>

Long-term Debt

The Commission carries no long term debt.

Economic Factors and Next Year's Budget

All these factors were considered in preparing the Commission's budget for the 2015 fiscal year.

- Effective January 1, 2015, the Commission began to pay the entire 3% employee mandatory contribution for those employees who are members of the Indiana Public Employees' Retirement System (INPRS).
- The INPRS Board of Trustees approved an employer pension contribution rate of 11.2% of full time employee salaries which brings the total employer pension costs to 14.2% of total employee salaries.
- Determining the employee and employer costs of health care for 2015 was a challenge. The change due to the Affordable Care Act is that health costs are now calculated by the employee's age and the ages of any dependents. To stay within budget, the Finance & Personnel Committee determined that the Commission will pay 85% and employees will pay 15% of actual health insurance costs.
- The annual employer contribution rate to the Health Saving Accounts were flat lined this year; \$2,000 for single and \$4,000 for the dependent coverage.
- For 2015, the Commission anticipates to experience a flat line in PL funding for the 2016 work plan. Some of this revenue reduction will be sublimated with Surface Transportation Programing (STP) planning funding of \$160,000.
- The Overall 2015 budget has decreased 5% from 2014.

Requests for Information

This financial report is designed to provide a general overview of the Northwestern Indiana Regional Planning Commission's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to Director of Finance, 6100 Southport Road, Portage, IN 46368 or by email at www.nirpc.org.

NORTHWESTERN INDIANA REGIONAL PLANNING COMMISSION
Notes to the Financial Statements
December 31, 2014

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements of the Northwestern Indiana Regional Planning Commission have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. A summary of the Commission's more significant accounting policies which have been consistently applied in the preparation of the accompanying financial statements is presented as follows:

A. ORGANIZATION OF THE REPORTING ENTITY

The Northwestern Indiana Regional Planning Commission (Commission) operates as a separate legal entity under provisions of the Indiana Code (Title 36, Article VII, Chapter 7.6). Its primary mission is planning and development coordination in northwestern Indiana, which includes Lake, Porter, and LaPorte Counties. Legislation enacted into law during 2007 changed the composition of the Commission. The governing body of the Commission currently consists of fifty-three members. Members are appointed by the counties, cities and towns within northwestern Indiana according to the provisions of the enabling legislation. Each county makes three appointments; each city and town appoints one member. All members must be elected officials. Members serve until replaced by the appointing authorities, which are typically the chief elected executive officials of the individual cities and towns and specified county officials. The Commission itself cannot remove a member for any reason.

According to state legislation, each of the three counties must make a mandatory appropriation to the Commission in an amount equal to seventy cents per capita. Counties voluntarily may make contributions in excess of this amount. The Commission selects and employs its Executive Director, controls the hiring of its employees and is responsible for its overall fiscal management. No other entity is responsible for the legal obligations of the Commission.

The enabling legislation under which the Commission was established provides for an appointing and funding process that is sufficient to support the conclusion that the Commission is not accountable to any other single unit of government. The Commission is a primary unit; it has no component units.

B. GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

Government-wide financial statements (i.e., the Statement of Net Position and the Statement of Activities) report information on all of the activities of the Commission. For the most part, the effect of interfund activity has been removed from these statements. Under governmental accounting standards, governmental activities, which normally are supported by taxes and intergovernmental revenues are reported separately from business-type activities which rely to a significant extent of fees and charges for support. The Commission does not have what are normally considered business-type activities.

The Statement of Activities demonstrates the degree to which direct expenses of a given function or segments are offset by program revenues. Direct expenses are clearly identifiable with a specific function or segment. Program revenues include grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Other items not properly included among program revenues are reported instead as general revenues.

The Commission has only governmental type funds. Major individual governmental funds are reported as separate columns in the fund financial statements.

C. MEASUREMENT FOCUS, BASIS OF ACCOUNTING AND FINANCIAL STATEMENT PRESENTATION

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Revenues from cost reimbursable grants, contracts or similar agreements are recognized when expenditures are made or as soon as all eligibility requirements imposed by the provider have been met. The Commission occasionally reports unearned revenues that arise when resources are received by the Commission before it has a legal claim to them, such as when grant or contract monies are received prior to the incurrence of qualifying expenditures. In subsequent periods or when the Commission has a legal claim to the resources, the liability for unearned revenues is removed from the combined balance sheet and revenue is recognized.

Governmental fund financial statements are reported using the current financial resources measurement focus and modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Federal grants are the major source of revenue and considered available once grant agreements are executed. Revenues are considered to be available when they are collectible in the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the Commission considers revenues to be available if they are collected within sixty days of the end of the current fiscal period. Expenditures are generally recorded when a liability is incurred, as under accrual accounting.

The Commission has established the following major governmental funds:

General Fund: The general fund is the general operating fund of the Commission. It is used to account for all financial resources not accounted for and reported in another fund. The revenues received support the Commission's general operation as well as specific programs relating to the Commission's primary mission of planning and development coordination.

Special Revenue Funds: Special revenue funds are used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. Special revenue funds are designed to help determine and demonstrate that resources that must be used for a specified purpose are, in fact, used for that purpose. At the core of each special revenue fund must be resources derived from one or more specific revenue sources. The Commission has two special revenue funds:

LaPorte Revolving Loan Fund: This special revenue fund is used to account for the restricted financial resources that are used in conjunction with a revolving loan program which is regulated by the Economic Development Administration. The purpose of the revolving loan program is to foster economic growth and development by providing below market loans to businesses and industries locating or expanding operations within LaPorte County. This special revenue fund is used to issue loans and receipt in the principal and interest payments from those loans. Payments received are distributed as identified in the mandated management plan for the program.

Transit Operating Fund: This special revenue fund is used to account for financial resources that are received from other governmental units and are provided to entities which operate public transportation service within northwestern Indiana.

Capital Projects Fund: Capital project funds are used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets. Capital project funds exclude those types of capital-related outflows financed by proprietary funds or for assets that will be held in trust for individuals, private organizations, or other governments.

Transit Capital Fund: This capital projects fund is a governmental type fund which is used to account for the financial resources that are used in the acquisition or purchase of capital equipment

and facilities used for public transit. The acquisition or purchase of operating equipment is accounted for in the general fund.

D. ASSETS, LIABILITIES AND NET POSITION

1. Deposits and Investments

The Commission's cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with original maturities of three months or less from the date of acquisition.

State statute (IC 5-13-9) authorizes the Commission to invest in securities, including but not limited to, federal government securities, repurchase agreements, and certain money market mutual funds. Certain other statutory restrictions apply to all investments made by local government units.

2. Interfund Transactions and Balances

Activities between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as "interfund receivables/payables (i.e., the current and non-current portion of interfund loans). All other outstanding balances between funds are reported as "interfund services provided/used."

3. Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements. The cost of the prepaid items is recorded as expenditures/expense when consumed rather than when purchased. The Commission uses the consumption method to recognize the prepaid items.

4. Capital Assets

Capital assets, which include property, plant, equipment and infrastructure assets (e.g. roads, bridges, sidewalks and similar items), are reported in the applicable governmental type activities column in the government-wide statements. The Commission does not own real property or infrastructure assets.

Capital assets are reported at actual or estimated historical cost based on appraisals or deflated current replacement cost. Contributed or donated assets are reported at estimated fair value at the time received. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend the useful life of an asset are not capitalized.

Statement No. 51 of the Governmental Accounting Standards Board (GASB), Accounting and Financial Reporting for Intangible Assets requires that intangible assets be classified as capital assets. For example, licensed financial accounting software that the government modifies to add special reporting capabilities would be considered internally generated software and is therefore an intangible asset. An intangible asset should be depreciated over the estimated useful life unless the intangible asset has an indefinite useful life. The Commission now owns an intangible asset.

The capitalization threshold (the dollar value above which asset acquisitions are added to the capital asset accounts) used by the Commission is \$5,000 (amount not rounded) and an estimated useful life in excess of one year. Computer and similar equipment that does not meet the threshold and useful life test, is not depreciated but maintained as an inventory item.

The Commission's equipment is depreciated using the straight line method of depreciation based on the following estimated useful lives:

Vehicles	4-12 Years
Office Equipment	4-6 Years
Computer Equipment	3 Years

5. Compensated Absences

It is the Commission's policy to permit employees to accumulate earned but not used vacation and personal leave time. There is no liability for unpaid accumulated personal leave since the Commission does not have a policy to pay any amounts when employees separate from service with the Commission. Vacation pay is accrued when incurred in the government-wide financial statements. Vacation time is earned at the rate of 9-18 days per year based on the number of years of service. A maximum of 30 days may be accrued at the end of any annual reporting period.

6. Fund Balance

Fund balance for governmental funds should be reported in classifications that comprise a hierarchy on the extent to which the government is bound to honor constraints on the specific purposes for which amounts in those funds can be spent.

The classifications should depict the nature of the net resources that are reported in a governmental fund. The fund balance classifications are reported as follows: restricted, committed, assigned, nonspendable, and unassigned.

- i. The restricted fund balance category includes amounts that can be spent only for the specific purposes stipulated by constitution, external resource providers, or through enabling legislation.
- ii. The committed fund balance category includes amounts that can be spent only for the specific purposes determined by a formal action of the Commission's Board.
- iii. The assigned fund balance category includes amounts that are constrained by the Commission's intent to be used for a specific purpose, but are neither restricted nor committed.
- iv. The nonspendable fund balance category includes amounts that cannot be spent because they are either (a) not in spendable form or (b) legally or contractually required to be maintained intact. The not in spendable form criterion includes items that are not expected to be converted to cash for example as inventories and prepaid amounts.
- v. The unassigned fund balance category is the residual classification for the government's general fund and includes all spendable amounts not contained in the other classifications.

The Commission has the following fund classifications: restricted, nonspendable, and unassigned.

The Commission considers restricted or unrestricted amounts to have been spent when an expenditure is incurred for purposes for which both restricted and unrestricted fund balance is available. The Commission's policy is to spend the restricted balances first before spending any unrestricted funds. Likewise, committed amounts would be reduced first, followed by assigned amounts, and then unassigned amounts when expenditures are incurred for purposes for which amounts in any of those unrestricted fund balance classifications could be used.

For the government-wide financial statements, net position is reported in three separate categories: investment in capital assets, net position–restricted, and net position–unrestricted. The financial statements report \$1,333,351 of restricted assets, of which \$0 is restricted by enabling legislation.

In the Commission’s financial statements, restricted assets of \$1,333,351 do not agree with the reported restricted net position of \$493,867. The difference is due to liabilities payable from restricted assets and unearned revenues totaling \$838,030 with a balance of \$1,454 which is the amount of the transfer between funds.

7. Allocated Costs

Under provisions of the U.S. Office of Management and Budget (OMB) Circular A-87, Attachment A, the Commission allocates to each program activity those costs which are “(a) incurred for a common or joint purpose benefiting more than one cost objective, and (b) not readily assignable to the cost objectives specifically benefited, without effort disproportionate to the results achieved”.

There are three categories of costs which are allocated. The first is leave costs which includes the employer’s cost of providing vacation, sick, personal, holiday and other leave (jury duty, military and funeral). The second is fringe benefits which includes the employer’s cost of providing various types of insurance, retirement benefits and social security taxes. The third is other indirect costs which includes those costs related to general management, finance and accounting, office operation and maintenance, and general clerical and printing functions. It also includes an aggregate amount of depreciation representing the expiration in the service life of capital assets of the general fund consisting primarily of office machines and furniture which is attributable to and charged as an expense during the reporting period.

The vehicle utilized to allocate costs is an indirect cost allocation plan which is prepared at the beginning of each year and establishes allocation rates based on prior experience and anticipated program effort. This plan is prepared by the Commission and is negotiated with the “cognizant federal agency for indirect costs” which for the past several years has been the Federal Highway Administration of the U.S. Department of Transportation working through the Indiana Department of Transportation. Provisional rates are established in this plan, which are used for billing purposes throughout the year. Upon the completion of an independent audit at the end of each year, final allocation rates are established based on actual costs. When actual costs are less than the amounts previously allocated, revenue is reduced and a liability is recognized.

During 2014, the Commission’s provisional allocation rates were as follows:

Leave Costs	16% of direct salaries and wages
Fringe Benefits	42% of total direct salaries and wages
Other Indirect Costs	70% of total direct personnel

8. Non-Governmental Accounts

Occasionally the Commission provides contractual services to non-governmental entities primarily not-for-profit agencies. The most common example of this occurs when the Commission acquires transit vehicles for such agencies through its Transit Capital Fund. In this circumstance, as well as other cases where a non-governmental entity provides revenue, it is reported under the heading “non-governmental accounts”.

II. STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

A. BUDGETARY INFORMATION

Annual budgets for the governmental funds are adopted on a basis consistent with accounting principles generally accepted in the United States of America. These funds include the Commission's general fund, its special revenue funds (the LaPorte Revolving Loan (RLF) Fund, and the Transit Operating Fund) and its one capital projects fund (the Transit Capital Fund). A proposed budget for the ensuing year is submitted to the Commission by the Executive Director. This usually occurs at the fourth quarterly meeting of the Commission which is typically held in October. The Commission may vote to adopt the budget at this meeting, or may call a special meeting to take action on the budget. The budget as adopted by the Commission is organized by object class categories. Major object class categories (which typically include salaries, fringe benefits, occupancy, equipment service and maintenance, departmental, contractual, and capital outlays) represent the legal level of control. Amendments to the adopted budget may be made only by the Commission at any regular meeting of the Commission or at any special meeting of the Commission called to consider the budget. The Commission has established a Finance and Personnel Committee composed exclusively of Commission members appointed by the Chair. This Committee exercises financial oversight over Commission operations and establishes more detailed accounts. Amounts presented in the financial statements are the final budget amounts for the year, as legally amended. No supplemental budgetary appropriations were made during the year ended December 31, 2014. Encumbrance accounting, under which purchase orders, contracts or other commitments for the expenditure of resources are recorded in order to reserve that portion of a relevant appropriation, is employed as an extension of the Commission's formal budgeting process in the governmental funds. Encumbrances outstanding at year-end are reported as restricted fund balances since they do not constitute expenditures or liabilities. All appropriations lapse at year-end. Outstanding encumbrances at year-end are re-appropriated in the ensuing year. The Commission had no outstanding encumbrances at year-end.

III. DETAILED NOTES ON ALL FUNDS

A. DEPOSITS

Custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. Indiana Code 5-13-8-1 allows a political subdivision of the State of Indiana to deposit public funds in a financial institution only if the financial institution is a depository eligible to receive state funds; and has a principal office or branch that qualifies to receive public funds of the political subdivision. The bank balances were insured by the Federal Deposit Insurance Corporation or the Public Deposit Insurance Fund, which covers all public funds held in approved depositories. The Commission does not have a custodial credit risk policy, other than to follow the statutes.

At year end, the Commission's carrying amount of deposits was \$1,924,442.

As of December 31, 2014, the entire amount reported as cash and cash equivalents on the statement of net position and the balance sheet was in the form of demand deposits.

In 2014, the U.S. Department of Commerce, Economic Development Administration, required the Commission to sequester \$133,005.52 as a result of holding excess funds during two or more consecutive reporting periods for the LaPorte Revolving Loan Fund. These funds had to be deposited into a separate interest bearing account with the quarterly interest submitted to EDA.

In 2015, the Commission received another request to sequester additional funds in the amount of \$23,805.80. The sequestered funds still belong to the Commission and can be used to make additional loans but approval from the Commission's RLF Administrator at the Economic Development Administration is needed.

B. INVESTMENTS

Authorization for investment activity is stated in Indiana Code 5-13. As of December 31, 2014, the Commission had no investments.

C. INTERFUND SERVICES PROVIDED AND USED

The Commission provides the administrative functions for the LaPorte Revolving Loan Fund (RLF) and in exchange the Commission's General Fund receives an annual interest payment from the revolving loan interest proceeds. The interfund services provided/used balance as of December 31, 2014 is \$1,454.

D. OPERATING LEASES

The Commission leases office facilities, postage equipment, and copier equipment under non-cancelable operating leases. Total costs for such leases were \$208,960 for the year ended December 31, 2014. The future minimum lease payments for these leases are as follows:

December 31,	Office	Postage	Copiers	Phones	Total
2015	\$ 199,134	\$ 1,740	\$ 20,760	\$2,502	\$ 224,136
2016	204,112	-	20,760	2,502	227,374
2017	209,215	-	3,460	2,085	214,760
	<u>\$612,461</u>	<u>\$ 1,740</u>	<u>\$ 44,980</u>	<u>\$7,089</u>	<u>\$ 666,270</u>

E. CAPITAL ASSETS

Capital asset activity for the year ended December 31, 2014 was as follows:

	Beginning Balance	Increases	Decreases	Ending Balance
Governmental activities:				
Capital assets not being depreciated:				
Intangibles	\$ -	\$ 10,828	\$ -	\$ 10,828
Total capital assets not being depreciated	-	10,828	-	10,828
Capital assets being depreciated:				
Machinery and Equipment	9,149,501	20,117	526,605	8,643,013
Less accumulated depreciation for:				
Machinery and Equipment	4,862,692	1,061,663	501,064	5,423,291
Net capital assets being depreciated	4,286,809	(1,041,546)	(25,541)	3,219,722
Total governmental activity				
Capital assets, net	<u>\$ 4,286,809</u>	<u>\$ (1,030,718)</u>	<u>\$ (25,541)</u>	<u>\$ 3,230,550</u>

Depreciation expense was charged to functions/programs of the Commission as follows:

Governmental activities:	
Planning and Development Activities	\$ 24,008
Transit Capital	<u>1,037,655</u>
Total depreciation expense	<u>\$1,061,663</u>

F. LONG-TERM LIABILITIES

Changes in long-term liabilities for the Commission for the year ended December 31, 2014 were as follows:

Changes in Long-Term Liabilities	Balance January 1	Increases	Decreases	Balance December 31	Amounts Due Within One Year	Amounts Due Thereafter
Government activities:						
Compensated absences	\$ 63,910	\$ 21,205	\$ (3,830)	\$ 81,285	\$ 8,129	\$ 73,156

The General Fund typically has been used to liquidate any long-term liabilities.

G. PRIOR PERIOD ADJUSTMENT

For the fiscal year ended December 31, 2014, certain changes have been made to the financial statements to more appropriately reflect financial activity. The prior period adjust reflects the change to the Indiana Public Retirement System (INPRS), the Commission’s benefit plan administrator, changing the pension plan to become a cost-sharing multiple-employer defined benefit pension plan. This change means for 2014, the net pension obligation is removed from the financial statements.

IV. OTHER INFORMATION

A. RISK MANAGEMENT

The Commission is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; job related illnesses or injuries to employees; medical benefits to employees and dependents, and natural disasters for which the Commission carries commercial insurance from independent third parties. There were no significant reductions in insurance coverage in the prior year. The amounts of settlements have not exceeded insurance coverage for any of the past three fiscal years.

B. CONTINGENT LIABILITIES

Amounts received or receivable from grant agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures that may be disallowed by the grantor cannot be determined at this time, although the Commission expects such amounts, if any, to be immaterial.

C. EMPLOYEE RETIREMENT SYSTEMS AND PENSION PLAN

1. Plan Description

The Commission contributes to the Public Employees’ Retirement Fund (PERF) a cost-sharing multiple-employer defined benefit pension plan, and administered by Indiana Public Retirement System (INPRS). PERF as part of the implementation of GASB Statement No. 67 changed from an agent to a cost-sharing, multiple-employer defined benefit plan effective July 1, 2013 based on 35 IAC 21-1-1, 35 IAC 21-1-2 and amended IC 5-10.2-2-11 (b).

The Indiana Code, Title 5, Articles 10.2 and 10.3, amended only by the Indiana General Assembly, identifies the benefit provisions and establishes the authority under which members and employers are obligated to contribute to the Plan.

All full-time employees are eligible to participate in the cost-sharing multiple-employer defined benefit plan. State statutes (Indiana Code 5-10.2 and 5-10.3) provide the Commission authority to contribute to the plan and govern, through the INPRS Board, most requirements of the system. PERF retirement benefit consists of the pension provided by employer contributions plus an annuity provided by the member's annuity savings account. The annuity savings account consists of member contributions, set by state statute at three percent of compensation, plus the interest credited to the member's account. Under state statute, the Commission may elect to make these contributions on behalf of the member. In 2013, the Commission elected to pay one and a half percent of the required employee member contribution.

INPRS administers the plan and issues a publicly available financial report that includes financial statements and required supplementary information for the plan as a whole and for its participants. That report may be obtained by contacting:

Indiana Public Retirement System
1 North Capitol Street, Suite 001
Indianapolis, IN 46204
Ph. (888) 526-1687
www.inprs.in.gov

2. Funding Policy and Annual Pension Cost

The contribution requirements for plan members of PERF are established and can be amended by the Board of Trustees of INPRS. Commission employees participating in the plan are required to contribute 1.5% of their annual covered salary with the Commission contributing the other 1.5% of employee's annual covered salary. The Commission is required to contribute at an actuarially determined rate; the rate which was contributed during calendar year 2014 was 11.20% of annual covered payroll.

The Commission's contributions to PERF for the years ending December 31, 2012, 2013, and 2014 were \$172,424, \$148,079, and \$162,964 respectively, equal to the required contributions for each year.

NOTE TO REQUIRED SUPPLEMENTARY INFORMATION
DECEMBER 31, 2014**

Note 1. Budgets and Budgetary Accounting

The Commission follows these procedures in establishing the budgetary data reflected in the budgetary comparison schedules:

- A. The Commission's annual budget for the governmental funds is adopted on a basis consistent with accounting principles generally accepted in the United States of America.
- B. A proposed budget for the ensuing year is submitted to the Commission by the Executive Director. This usually occurs at the fourth quarterly meeting of the Commission which is typically held in October.
- C. The budget as adopted by the Commission is organized by object class categories. Major object class categories which typically include salaries, fringe benefits, occupancy, equipment service and maintenance, departmental, contractual, and capital outlays represent the legal level of control.
- D. Amendments to the adopted budget may be made only by the Commission at any regular meeting of the Commission or at any special meeting of the Commission called to consider the budget.
- E. The Commission has established a Finance and Personnel Committee composed exclusively of Commission members appointed by the Chair. This Committee exercises financial oversight over Commission operations and establishes more detailed accounts.
- F. Amounts presented in the financial statements are the final budget amounts for the year, as legally amended.

Compliance

This Page is Intentionally Blank

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR
FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE

TO: THE OFFICIALS OF THE NORTHWESTERN INDIANA REGIONAL PLANNING
COMMISSION, LAKE, PORTER, AND LAPORTE COUNTIES, INDIANA

Report on Compliance for Each Major Federal Program

We have audited the Northwestern Indiana Regional Planning Commission's (Commission) compliance with the types of compliance requirements described in the *OMB Circular A-133 Compliance Supplement* that could have a direct and material effect on each of its major federal programs for the year ended December 31, 2014. The Commission's major federal programs are identified in the Summary of Auditor's Results section of the accompanying Schedule of Findings and Questioned Costs.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of the Commission's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Commission's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the Commission's compliance.

Opinion on Each Major Federal Program

In our opinion, the Commission complied in all material respects with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended December 31, 2014.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR
FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE
(Continued)

Report on Internal Control Over Compliance

Management of the Commission is responsible for establishing and maintaining effective internal control over compliance with types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Commission's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Commission's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be material weaknesses.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the deficiencies in internal control over compliance described in the accompanying Schedule of Findings and Questioned Costs as item 2014-001 to be material weaknesses.

The Commission's response to the internal control over compliance findings identified in our audit is described in the accompanying Corrective Action Plan. The Commission's response was not subjected to the auditing procedures applied in the audit of compliance and accordingly, we express no opinion on the response.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of OMB Circular A-133. Accordingly, this report is not suitable for any other purpose. In accordance with Indiana Code 5-11-5-1, this report is a part of the public records of the Indiana State Board of Accounts and of the office examined.

Paul D. Joyce, CPA
State Examiner

The accompanying notes are an integral part of the Schedule of Expenditures of Federal Awards.

**NORTHWESTERN INDIANA REGIONAL PLANNING COMMISSION
NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS
DECEMBER 31, 2014**

Note 1. Basis of Presentation

The accompanying Schedule of Expenditures of Federal Awards includes the federal grant activity of the Northwestern Indiana Regional Planning Commission (primary government) and is presented in accordance with the requirements of OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations. Accordingly, the amount of federal awards expended is based on when the activity related to the award occurs. Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in preparation of, the basic financial statements.

Note 2. Subrecipients

Of the federal expenditures presented in the schedule, the primary government provided federal awards to subrecipients as follows for the year ended December 31, 2014:

<u>Program Title</u>	<u>Federal CFDA Number</u>	<u>Amount Provided to Subrecipients</u>
Federal Transit_Formula Grants	20.507	<u>\$ 2,628,490</u>

Note 3. Calculation of Expenditures of the Economic Development Administration Revolving Loan Fund

Balance of RLF loans outstanding at the end of the fiscal year	\$ 103,383
Plus: Cash and investment balance in the RLF at the end of the fiscal year	392,539
Plus: Administrative expenses incurred not yet paid for 2014	<u>2,000</u>
 Total Calculation Basis	 497,922
 Calculation for Federal Participation Rate	
Original Economic Development Administration Funding	700,000
Local Match:	<u>266,667</u>
 Total Original Grant with Original Match	 966,667
 Federal Participation Rate (Federal grant awarded divided by total program)	 72.41%
 The Federal share of the LaPorte Revolving Loan Fund	 \$ 360,564

NORTHWESTERN INDIANA REGIONAL PLANNING COMMISSION
SCHEDULE OF FINDINGS AND QUESTIONED COSTS

Section I – Summary of Auditor's Results

Financial Statements:

Type of auditor's report issued:	Unmodified
Internal control over financial reporting:	
Material weaknesses identified?	no
Significant deficiencies identified?	none reported
Noncompliance material to financial statements noted?	no

Federal Awards:

Internal control over major programs:	
Material weaknesses identified?	yes
Significant deficiencies identified?	none reported
Type of auditor's report issued on compliance for major programs:	Unmodified
Any audit findings disclosed that are required to be reported in accordance with Section 510(a) of <i>OMB Circular A-133</i> ?	yes

Identification of Major Programs:

CFDA Number	Name of Federal Program or Cluster
20.505	Federal Transit Cluster Highway Planning and Construction Cluster Metropolitan Transportation Planning and State and Non-Metropolitan Planning and Research

Dollar threshold used to distinguish between Type A and Type B programs: \$300,000

Auditee qualified as low-risk auditee? no

Section II – Financial Statement Findings

No matters are reportable.

NORTHWESTERN INDIANA REGIONAL PLANNING COMMISSION
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
(Continued)

Section III – Federal Award Findings and Questioned Costs

FINDING 2014-001 - CASH MANAGEMENT AND REPORTING

Federal Agency: U.S. Department of Transportation
Federal Programs: Federal Transit_Formula Grants, Highway Planning and Construction, Metropolitan Transportation Planning and State and Non-Metropolitan Planning and Research
CFDA Numbers: 20.507, 20.205, 20.505
Federal Award Numbers: IN90-X653, PL-0012805561, PL-0014805082, STP-0015808664, STP-0014805228, CQ-0012805562, CQ-0010807052, CQ-0013803302, 5303-0013803302
Direct Grant for 20.507
Pass-Through Entity: Indiana Department of Transportation for CFDA numbers 20.205 and 20.505

Management of the Commission has not established an effective internal control system, which would include segregation of duties, related to the grant agreement and the Cash Management and Reporting compliance requirements.

Federal Transit_Formula Grants

The Commission has not designed or implemented procedures to ensure compliance with the reporting requirements for Subaward reporting under the Transparency Act. One individual is responsible for preparing and submitting the reports on the Transparency website. An oversight, review, or approval process has not been established to ensure that the reports are accurate and complete and that they comply with the reporting requirements.

Highway Planning and Construction, Metropolitan Transportation Planning and State and Non-Metropolitan Planning and Research

The Commission has not designed or implemented procedures to ensure compliance with the cash management and reporting requirements of the programs. The Commission is required to submit quarterly reports which are requests for reimbursement of their expenditures to the Indiana Department of Transportation. Officials stated that reports were reviewed prior to submission; however, evidence of a review or oversight process to ensure compliance with the Cash Management and Reporting requirements was not provided.

The failure to establish an effective internal control system places the Commission at risk of noncompliance with the grant agreement and the compliance requirements. A lack of segregation of duties within an internal control system could also allow noncompliance with compliance requirements and allow the misuse and mismanagement of federal funds and assets by not having proper oversight, reviews, and approvals over the activities of the program.

An internal control system, including segregation of duties, should be designed and operate effectively to provide reasonable assurance that material noncompliance with the grant agreement or a compliance requirement of a federal program will be prevented, or detected and corrected, on a timely basis. In order to have an effective internal control system, it is important to have proper segregation of duties. This is accomplished by making sure proper oversight, reviews, and approvals take place and to have a separation of functions over certain activities related to the program. The fundamental premise of segregation of duties is that an individual or small group of individuals should not be in a position to initiate, approve, undertake, and review the same activity.

NORTHWESTERN INDIANA REGIONAL PLANNING COMMISSION
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
(Continued)

OMB Circular A-133, Subpart C, section .300 states in part:

"The auditee shall: . . . (b) Maintain internal control over Federal programs that provides reasonable assurance that the auditee is managing Federal awards in compliance with laws, regulations, and the provisions of contracts or grant agreements that could have a material effect on each of its Federal programs."

The failure to establish internal controls could enable material noncompliance to go undetected. Noncompliance with the grant agreement or the compliance requirements could result in the loss of federal funds to the Commission.

We recommended that the Commission's management establish controls, including segregation of duties, related to the grant agreement and compliance requirements listed above.

CORRECTIVE ACTION PLAN

FINDING 2014-001

Contact Person Responsible for Corrective Action: Angie Hayes, Director of Finance & Administration
Contact Phone Number: 219-763-6060

Description of Corrective Action Plan:

Federal Transit_Formula Grants

The Commission has been submitting Subaward reporting under the Transparency Act. A review and approval process has now been developed to ensure reports are accurate, complete and comply with the reporting requirements. Once the Subaward contracts are signed by both parties, the Subawards will be entered into the federal website and a draft report will be created. This report will then be reviewed and initialed prior to the report submission in the federal system.

Highway Planning and Construction, Metropolitan Transportation Planning and State and Non-Metropolitan Planning and Research

As the Director of Finance and Administration for the Commission I disagree with this portion of the finding. Currently there are procedures in place to ensure compliance with the cash management and reporting requirements of the program. The procedure has the Director of Finance and Administration review the reports prior to submission to the Indiana Department of Transportation (INDOT). Staff presented documentation during the audit, however this documentation was not accepted for reasons unknown. In the future, the Director of Finance and Administration will initial on the quarterly report letter to INDOT after the review has been completed.

Anticipated Completion Date: August 3, 2015

A handwritten signature in black ink that reads "Angie Hayes".

Angie Hayes
Director of Finance & Administration

OTHER REPORT

In addition to this report, a Supplemental Compliance Report has been issued for the Commission. That report can be found on the Indiana State Board of Accounts' website: <http://www.in.gov/sboa/>.
