

Use & Notification

Two types of CHEMPACK containers

EMS containers

- Geared to first responder field use
- 85% auto injectors
- 454 casualty capacity

Hospital containers

- Geared to clinical care environment
- 85% multi-dose vials, must be reconstituted
- 1,000 casualty capacity

Events that warrant opening the CHEMPACK

Any of the following events, after local resources are exhausted.

- Accident with organophosphate pesticides
 - At farm or industry
 - In transport
- Terrorism event with nerve agent exposure
 - Possible agents: Sarin, Soman, Tabun, & VX

[CHEMPACK SharePoint](#)

Here you can retrieve CHEMPACK information and find CHEMPACK points of contact. Link is provided in the title above.

Indiana Workspace shares:

- a cache locator map
- Cache site POC list
- container moves documents,
- extended not relabeled (ENR) information,
- copy of the memorandum of agreement (MOA),
- planning and training documents, from other cache sites and ASPR

If you are interested in a local CHEMPACK educational presentation, please contact Colette Jacob, contact information is below.
