Visitation Guidelines for Long-term Care Facilities – UPDATE

On February 25, 2021, the Indiana Department of Health updated the visitation guidelines for long-term care facilities. The updates include the following:

- Removes the requirement for quarantine following an excursion if excursion is less than 24 hours duration.
- Requires facilities to offer at least eight hours of indoor visitation daily, including evening and weekend hours unless the facility is under visitor restrictions due to a new facility-onset COVID-19 case or count positivity rate.
