## **2014 Screening Levels Tables Now Available**

March 5, 2014

A link to IDEM's 2014 screening levels tables (Tables A-6 and A-7) is, or will soon be, available on the risk-based closure web page at: <https://www.in.gov/idem/cleanups/2392.htm>. As noted on page 10 of the [Remediation Program Guide](#), a six-month transition period applies to the new tables.

The 2014 version of Table A-6 includes all of the chemicals found in the 2013 table. In addition, it contains new entries for the following eight chemicals: *tert*-amyl alcohol, butylated hydroxytoluene, *sec*-butylbenzene, *tert*-butylbenzene, dibenzothiophene, technical grade dinitrotoluene, thiocyanic acid, and tricresyl phosphate.

The table also reflects more than one hundred changes in various screening levels, among them changes to certain screening levels for 2,6-dinitrotoluene, *n*-nonane, and tetryl. Perhaps of greatest interest, the 2014 table incorporates [previously announced optional screening levels for arsenic](#).
