The Economic Side

Economic development is the development of economic wealth of countries, regions or communities for the well-being of their inhabitants.

- Energy
- Taxes

- Food
- Supplies for local production

BUILDING BETTER COMMUNITIES
Community Development is a process designed to create conditions of economic and social progress for the whole community with its active participation and fullest possible reliance upon the community’s initiative.

United Nations 1948
Communities exist because of, and for, the benefit of individuals

Community ‘infrastructures’ exist within a larger political, regulatory, civic, and social environment
PLANNING: It’s All About the Process

Vision?
  Mission?
    Purpose?
      Strategy?
        Goals?
          Objectives?
            Action Plans?
              Implementation Plans?
                Impact?
                  Sustainability?
                    Return on Investment?
