#	RESPONDENT'S QUESTION	STATE'S RESPONSE
	Clarification of wording: "70,775 two side variable data..." Does this mean the item prints 2-sided + variable on one side or does this mean that there is variable data on both sides of the card?	Item prints two sided with variable data on both sides.
	Is the UV coating on both sides of the card or only on one side? If the card has only one side of variable code and only one side of UV is the UV side the non - variable side?	UV coating should be applied to both sides of the card.
	Is the variable data printed in four color process also??	Yes, variable data should be printed four color also.
