I. 2019 Grant Application Timeline

Monday, June 3
Application posted on Indiana Commission for Higher Education website at www.in.gov/che

Friday, July 12
Applications due at CHE by 5pm (Eastern)

Monday, July 15 – Tuesday, July 30
Application review period

Thursday, August 1
Applicants notified of status, grants awarded

The grant period is July 1, 2019 through June 30, 2021. Costs incurred from July 1, 2019 until the date of grant awarding may be invoiced. Prior to July 1, 2020, CHE will pay no more than 50% of a grant recipients’ total award as listed in the “Grant Award Information” section of the executed Grant Award Agreement.

Applications may be submitted by postal mail to:

Indiana Commission for Higher Education
ATTN: STEM Teacher Recruitment Grant Fund
101 West Ohio Street, Suite 300
Indianapolis, IN 46204

Applications may also be submitted by email to the program contact at the email addresses listed below.

Program Contact:

Eugene Johnson, Assistant Commissioner

Phone: (317) 232-2368
II. **Background**

The Indiana STEM Teacher Recruitment Fund was initially established by the Indiana General Assembly during the 2013 Legislative Session. The fund was established to:

- Encourage the growth of existing organizations that recruit science, technology, engineering, and mathematics (STEM) teachers in eligible school corporations\(^1\). Growth of existing organizations includes, but is not limited to, organizations that:
  - Recruit and retain high-quality STEM teachers
  - Provide professional development opportunities for STEM teachers in eligible Indiana school corporations\(^2\)
  - Provide STEM program content and learning opportunities that teachers can utilize to teach STEM coursework in grades K-12

- Support the establishment of programs that increase the pool of high-quality STEM teachers in eligible school corporations\(^3\) in Indiana. Increasing the pool of high-quality STEM teachers includes, but is not limited to, programs that:
  - Recruit and retain high-quality STEM teachers
  - Increase the pool of secondary school teachers eligible to teach dual-credit and other college-level STEM subjects

- Identify recruiting organizations and programs that:
  - Show documented production of high student achievement and effective and highly effective teachers
  - Match science, technology, engineering, and mathematics teachers with eligible school corporations\(^4\) that are encountering shortages of qualified teachers
  - Place new science, technology, engineering, and math teachers in schools located in underserved areas

---

\(^1\) As described in IC 20-18-2-16.
\(^2\) See 1
\(^3\) See 1
\(^4\) See 1
III. **Objectives**

To provide grants to Indiana non-profit organizations\(^5\) and programs\(^6\) which: a) recruit and place science, technology, engineering and mathematics teachers in Indiana school corporations located in underserved areas or that are encountering a shortage of qualified teachers and/or b) establish programs that increase the pool of high-quality science, technology, engineering and mathematics teachers in Indiana.

To be considered for a grant, organizations and programs must demonstrate prior success in recruitment, development, licensure or permitting of highly effective STEM teachers and high student achievement, or must provide a plan/framework that will accomplish these goals. Organizations and programs must match STEM teachers with eligible Indiana school corporations that would otherwise encounter a shortage of qualified teachers in K-12 science, technology, engineering and mathematics. Grants may be used to recruit, train and place new STEM teachers; to provide pre-service and in-service teachers with skills to teach new or additional STEM coursework; and to ensure STEM teachers have the necessary qualifications to teach current and future school STEM dual-credit and college-level coursework.

“New STEM teacher” means an individual who meets at least one of the following definitions:

- Has at least a baccalaureate degree from a regionally-accredited institution in a STEM field but who has not previously been granted a license or permit to teach a STEM subject or content area in an Indiana public school;
- Is completing a baccalaureate degree from a regionally-accredited institution in a STEM field and who also is completing teacher licensing requirements in a STEM subject or content area;
- Has work experience in a STEM field but who has not previously been licensed to teach a STEM subject or content area in an Indiana public school;
- Is licensed to teach in an Indiana public school and becomes licensed to teach a STEM subject or content area.

“Pre-service teacher” means an individual who:

- Is engaged in training designed to become an effective STEM teacher; and
- Plans to teach STEM coursework in an Indiana school corporation.

\(^5\) Entities must be registered as a non-profit domestic or foreign corporation with the Indiana Secretary of State.  
\(^6\) Same as 5
“In-service teacher” means an individual who:

- Is currently licensed to teach in an Indiana public school; and
- Is looking to obtain training to teach in a STEM subject or content area different than their current position or to teach advanced subject or content area within their current position

The term “licensure” includes receiving the following licenses:

- Workplace Specialist license
- Transition to Teaching license
- Charter school license
- Initial, proficient, or accomplished practitioner license and the equivalent under prior administrative rules

The term “permit” includes:

- Emergency permit
- Transition to Teaching permit
- An individual eligible to teach in a charter school pursuant to IC 20-24-6-5
- Career Specialist permit

The term “completes training” includes:

- Training provided by organizations specializing in the development of K-12 STEM curricula and courses, including dual credit courses
- Training for online K-12 STEM curricula and courses that utilize a blended instructional model

STEM subjects: Individuals recruited and trained by organizations and programs to be STEM teachers must seek licensure or training in K-12 science, technology, engineering or math subjects or content areas approved by the Indiana State Board of Education. Examples include:

- Elementary science and math
- Middle school science, technology, engineering, or math
- High school science, technology, engineering, or math
- Advanced Placement and International Baccalaureate science, technology, engineering, or math courses and other similar advanced courses
- Dual credit science, technology, engineering, or math courses listed on the Indiana Core Transfer Library
- Certain career and technical education courses in STEM fields
A school corporation “encountering a shortage of qualified teachers” must:

- Certify that the school corporation has determined the need to seek an emergency permit for a teacher of a STEM subject or course; or
- Have a shortage of teachers of a STEM subject or course as determined by the State Board of Education or the school corporation; or
- Have no current employee eligible to teach the STEM subject or course

An “underserved” Indiana school corporation must:

- Have a complexity index determined by IC 20-43-13 greater than the state average; or
- Must employ a program participant or contract for the services of a program participant to serve predominantly in a Title I school(s).
IV. **Entities Eligible to Apply**

New and existing organizations or programs may apply for grant consideration. Consideration for a grant will be given to entities that:

- Operate programs that successfully recruit, train and place new STEM teachers in grades K-12 in underserved Indiana school corporations or corporations experiencing a shortage of qualified STEM teachers; or
- Operate programs which enhance the ability of in-service teachers currently employed in Indiana school corporations to teach STEM-specific coursework; or
- Plan to develop and operate new programs designed to place STEM teachers in grades K-12 in underserved Indiana school corporations or school corporations experiencing a shortage of qualified STEM teachers; or
- Focus on at least one of the following:
  - Recruitment and retaining STEM teachers who will be employed in school corporations; or
  - Providing training necessary for pre and in-service teachers to become eligible to, or maintain eligibility to teach secondary dual-credit and college-level coursework; or
  - Providing in-service STEM teacher professional development

New\(^7\) organizations or programs are those that have not been prior recipients of the STEM Teacher Recruitment Fund Grant that will establish programs that will increase the pool of high-quality science, technology, engineering and mathematics teachers in Indiana.

Existing\(^8\) organizations or programs are those that previously received and utilized a STEM Teacher Recruitment Fund Grant and that will continue to recruit and train eligible, new pre-service or in-service science, technology, engineering and mathematics teachers.

Entities must be registered as a non-profit domestic or foreign corporation with the Indiana Secretary of State. Please include a copy of the entity’s most current organizational chart with all applications.

---

\(^7\) Indiana Code 21-13-11-9(2)  
\(^8\) Indiana Code 21-13-11-9(1)
V. **Authorized Activities and Use of Funds**

Grant recipients are responsible for complying with Indiana teacher licensure and permit requirements.

Program participants must be employed or seek employment in an Indiana public school corporation, including charter schools. Current employment or seeking employment in a non-public school or a non-Indiana school corporation does not qualify the program participant to receive program support.

**Conditions:**

1. Individuals who accept program financial support to become licensed or trained to teach science, technology, engineering, or math subjects or content areas must apply to teach in Indiana public school corporations (including charter schools) and must accept employment or a contract for services if offered.

2. Individuals who accept program financial support and who do not apply, do not accept employment, do not accept a contract to offer services in an eligible Indiana school corporation or charter school, or who do not complete an employment contract or a contract to offer services will be expected to repay the amount of financial support received from the program, absent exigent circumstances.

3. Employment or contracting for services in a non-public school is not a permissible program outcome.

4. Employment or contracting for services with a non-Indiana school is not a permissible program outcome.

5. Training provided and skills learned cannot be restricted to use for specific employers or providers.
VI. Mandatory and Preferred Activities

Mandatory:

1. Licensure: the program must result in individuals becoming licensed or trained to teach in Indiana public school K-12 science, technology, engineering, or math subjects or content areas for which they were not previously eligible to teach or that they will become ineligible to teach in the future.

2. As a condition of receiving program support, organizations must ensure pre-service or new in-service teachers seek employment in an eligible Indiana public school corporation or charter school.

Preferred:

1. Alignment with initiatives that expand STEM learning activities or enhance STEM student academic achievement, such as:
   - Math-Science Partnerships
   - 21st Century Learning Community Center grants
   - National Math & Science Initiative
   - Indiana Works Councils Innovative Career and Technical Education (CTE) grants
   - STEM learning activities in addition to the required instructional time
   - Local school STEM activities

2. Connections to initiatives that improve STEM learning and work outcomes in which students complete:
   - Diplomas or certificates of achievement with a STEM emphasis
   - Industry certifications in a STEM occupation
   - Dual credit or advanced placement courses in a STEM subject
   - Internships, apprenticeships or other STEM work-based learning activities

3. Connections to Indiana STEM economic growth opportunities, such as:
   - Life sciences, including medical and health technologies
   - Advanced manufacturing
   - Engineering and engineering technologies
   - Computer and information sciences
   - Agriculture and agriscience
   - Energy, including renewable energy

---

9 Please reference [www.in.gov/irwc/2362.htm](http://www.in.gov/irwc/2362.htm) for more information on CTE grants.
• Other Indiana STEM growth areas (please specify)

4. Alignment with state and federal incentives that might be applicable to STEM teachers, including:
   • William A Crawford Minority Teacher Scholarship
   • Earline S. Rogers Student Teaching Stipend for Minorities
   • Student Teaching Stipend for High-Need Fields
   • Next Generation Hoosier Educator Scholarship
   • State, federal or teacher loan forgiveness or cancellation programs
VII. **Grant Application Evaluation and Priority, Recipients, Award Amounts and Budget**

1. Applications will be evaluated based on the classification of the applicants as stated in Section IV and utilizing the scoring rubrics located in Section IX of this RFP.

2. Funding priority will be given to applicants who demonstrate:
   - Filling immediate needs in STEM Teacher recruitment, training, and placement in eligible Indiana K-12 schools
   - Providing resources to assist STEM teachers in meeting standards for teaching secondary dual-credit and other secondary education college-level coursework
   - Expanding STEM training and professional development opportunities
   - Expanding Indiana’s STEM teacher pipeline

3. Grant recipients and award amounts will be determined by the Commission. Awards will be based on review of the application for funding, including the scope of work, the amount of funding requested, the anticipated outcomes of the project, meeting priority STEM teaching and training needs and available grant funds.

4. A budget narrative must be included as part of the application and descriptions of all line-item expenses listed in the budget worksheet must be included.

5. The amount of funding requested should be reasonable and in line with the scope of work the applicant will conduct during the grant award period. Funding requests and expenses that are deemed excessive may require the applicant to provide the Commission with additional details concerning the request.

6. The Commission and the program applicant may mutually agree to modify the requested budget.

7. Personnel and financial resource contributions by the applicant and partners will be considered as a stronger commitment to the proposal.
Invoicing

Invoices must be submitted to finance@che.in.gov on a monthly basis, with the final invoice being submitted no later than 60 days after the end of the project term. Invoices must include all categories listed in the budget included as part of a fully executed Grant Award Agreement, and must list the following categories:

- Expenditures
  - Current
  - Cumulative
- Total amount budgeted per category
- Budget amount remaining per category
IX. Changes to Fully Executed Grant Award Agreements

Changes or updates to a grant award agreement must be submitted to CHE for review. Approved changes an amendment to the initial agreement. Prior to approval of the requested changes or updates and a fully executed amendment to the Agreement being active, no funds can be expended.

Changes and updates should be request only as required to meet project needs.
X. Required Reporting

Indiana Code 21-13-11-12 requires that a recipient of a grant under this chapter submit to the Commission a written report concerning the recipient’s compliance with the program evaluation standards by the following dates:

- December 1 of each grant award year\textsuperscript{10}
- July 1 of each award year\textsuperscript{11}

Reports are due no later than the dates listed above. The Commission may withhold payment of invoices until the report has been submitted. Reports may be submitted by postal mail or by email to the contact listed on page one.

Reports must include (as applicable):

1) For new STEM teachers receiving support through grants funds: the duration of service in an Indiana school corporation or the length of time committed to teaching in an Indiana school corporation;
2) For pre-service or in-service teachers: average length of service for teachers supported; skills enhanced or new skills attained as part of participation in program using grant funds;
3) The effectiveness of the program, including:
   - Number of individuals licensed or trained to teach science, technology, engineering, or math K-12 subjects and content areas, including dual credit courses in Indiana public schools
   - Teacher ratings according to IC 20-28-11.5, aggregated for the program’s participants
4) Student academic achievement improvements in the following areas, as available:
   - ISTEP [math and science]
   - Algebra I end-of-course exam
   - Biology I end-of-course exam
   - Dual credit or advanced placement exams in STEM subjects
   - Industry certification exams in STEM fields
   - Locally-adopted STEM assessments [Acuity, NWEA, etc.]
   - STEM classes or courses added to the school schedule:

\textsuperscript{10} Pursuant to IC 21-13-11-13, these reports must be considered in any review of a subsequent grant application from the registered non-profit domestic or foreign corporation.
\textsuperscript{11} Same as 7
• Increase in number of classes or enrollment in courses already offered
• New STEM classes added to school’s curriculum offerings

5) Effective use of funds:
   a) Cost per participant
   b) Number of individuals who become STEM teachers
   c) Length of service expected of program participants
   d) New pre-service or in-service teachers supported
   e) Number of schools supported (names and grade levels of schools should be included)

6) Partnerships utilized to support student and teacher achievement in STEM-related fields
   a) Outcomes of partnerships
   b) Number of partnerships created or enhanced utilizing grant funds (names of partners should be included)

APPENDICES
APPENDIX A

APPLICATION EVALUATION - Existing Organizations and Programs

Strategies to:

1) Recruit, train, and place during the grant award period new STEM teachers in underserved locations
   a. Recruitment of and outreach to individuals who will teach STEM subject and content matter
   b. Activities related to preparing STEM teachers for placement in eligible school corporations statewide
2) Enhance the ability of pre-service and in-service teachers to teach new or additional STEM-related secondary dual-credit and college-level coursework
   a. Providing training opportunities for teachers to meet accreditation standards necessary to teach dual-credit, advanced placement, international baccalaureate, or similar secondary school college-level coursework
   b. Assist teachers with resources necessary to teach additional STEM coursework beyond their primary subject
3) Provide STEM teachers with professional development and STEM education programming
   a. Partnerships with eligible school corporations to STEM programming and curriculum that provide professional development for teachers and additional STEM content for students, including work and project-based learning activities.
4) Organization’s prior history and outcomes working in and with Indiana school corporations in increasing positive STEM teaching and training outcomes.
5) Compliance with grant evaluation standards of prior grant as reported by the organization.

Cost effectiveness of proposal including, but not limited to:

1) Training cost per teacher, including tuition or scholarship support provided
2) Number of teachers to be supported
3) Number of K-12 public schools to be supported
4) Fund usage as stated in budget worksheet; particular emphasis will be placed on percentage of funding going to staffing, travel and related costs as a percent of total fund usage
STEM teacher retention strategies

1) Methods used to retain new STEM teachers and to support the growth of in-service teachers
2) Quantitative data showing retention achieved thru the organization or program

Maximum Pages: 4  Maximum Points: 15

Current or proposed partnerships with STEM-based industries, organizations and service providers

a. Relationships with entities supporting student and teacher achievement in STEM-related fields

Maximum Pages: 4  Maximum Points: 10

Total Maximum Pages: 20  Total Maximum Points: 100
