### **Boyce Cloud Proposal for Updated Municipal Software**

Clerk-Treasurer Barb Hawn provided a Boyce Cloud agreement to the Council for consideration. She noted the recent software demo highlighted the enhanced features and streamlined services it would provide—not only for city employees, but also for city residents, who would be able to view their account information, water usage, and bills online.

The annual fee for the software would be \$44,630, with additional one-time costs for project management, product configuration, implementation, and training. All costs would be split three ways: General, Water, and Sewage.

She stated that she believes this is the right time to move forward, as the system will offer modern, user-friendly software for both staff and residents. The total cost for initial setup, installation, and the first-year fee would not exceed \$78,705.

If the City signs the agreement now, installation is expected in August 2026. The migration fee of \$42,500 will be waived if the agreement is signed at this time. Since the City's current software will eventually be discontinued, the Clerk-Treasurer noted that the transition will be required in the future. After consulting with the City's financial advisor, she stated that he recommended moving forward now, while the migration fee is waived and before the cost potentially increases. He also felt the fees could be incorporated into the budget.
