This radio system will cover all Floyd county fire departments. This will be a back-up system to our repeater that is now in use. We at the Georgetown Fire Department are having major problems with our radio's working while in down town Georgetown. If we get this back up repeater installed on the

water tower on Baylor Wissman rd, it will take care of this problem. This will also help other agencies with their radio problems in down town Georgetown. We are asking to be granted the amount of **\$18000.00** to complete this project.
