

**Ordinance Establishing Storm Water Drainage
Maintenance Standards and Control**

BE IT ORDAINED, by the Floyd County Commissioners, as follows:

The intent of this ordinance is to insure proper Stormwater drainage in the territory comprising all of Floyd County that is governed by its MS4 permit holder. The benefits of this Ordinance will be increased property values, public safety, and public health.

I. Authority

This ordinance is adopted under the authority granted by Indiana Code 14-33-5-20 which mandates that the Stormwater Board make regulations for the administration of the affairs of Floyd County.

II. Finding and Purpose

FINDING. The Stormwater Board find that the original Stormwater drainage facilities constructed within the developed areas of Floyd County have become inadequate or of limited use, because of aging, neglect, encroachment, pollution, changing of topography of the drainage area, lack of maintenance, and that immediate steps need to insure that the purposes of the Board relating to Stormwater drainage are accomplished.

Purposes. The purposes of this ordinance are to:

1. Prevent the degradation of the Stormwater drainage facilities within the County;
2. Correct problems associated with encroachment of constructed improvements in drainage easements;
3. Correct problems associated with uncontrolled vegetative growth within drainage easements;
4. To protect and promote the health, safety, and welfare of persons within the County by improving Stormwater drainage in order to minimize standing water that could provide a habitat for the proliferation of insects that are potential carriers of diseases affecting the residents of the County.

III. Applicability

This ordinance applies to all conditions and activities that are serviced by the MS4 permit holder within the boundaries and jurisdiction of Floyd County.

IV. Definitions

- 1) No individual parcel owner shall allow a drainage way on an individual parcel that the individual parcel owner has an interest in:
 - a. To be blocked by vegetative growth of a height of more than twelve (12) inches above the ground level such that the vegetative growth restricts the flow of Stormwater Runoff.
 - b. To be blocked by any fence or other man-made object that restricts the flow of Stormwater Runoff.
- 2) No individual parcel owner shall allow anything to be constructed in a drainage way on an individual parcel that the individual parcel owner has an interest in such a way that it restricts the flow of Stormwater Runoff.
- 3) No individual parcel owner shall change the grading in a drainage way on an individual parcel that the individual parcel owner has an interest in such a way to restrict the flow of Stormwater Runoff or allow the ponding of Stormwater Runoff.

4) No person shall hinder Stormwater Runoff in a Drainage Way or fail to keep and maintain any part of a drainage way free of trash, debris, yard waste, excessive vegetation, and other obstacles that would pollute, contaminate, obstruct, hinder, or significantly retard the flow of water through the drainage way, In addition, every individual parcel owner shall maintain existing privately owned structures on their Individual parcel adjacent to a watercourse, so that such structures will not become a hazard or impediment to the use, function, or physical integrity of any Drainage Way.

If, within thirty (30) days after issuance of a notice of violation, an Individual Parcel Owner does not comply with the requirements of this ordinance, the Board may seek enforcement of the requirements of this ordinance and seek fines, as provided below.
