CRITICAL ITEMS ARE IDENTIFIED IN THE CHECKLIST AND NARRATIVE COLUMNS MARKED "C"  
VIOLATION(S) REPEATED FROM PREVIOUS INSPECTIONS ARE DENOTED IN THE "SUMMARY OF VIOLATIONS" AND IN THE NARRATIVE COLUMN MARKED AS "R"

Section #	C	NC	R	Narrative	To Be Corrected
431		X		Observed clogged gutters on the back of the building	1 week
343	X			Observed no handsink in the kitchen. There was only a 3 compartment sink. This was an existing setup from the previous owner. The establishment should designate the first compartment of the 3 comp sink as a handwashing sink and not stack dishes in it. It should be cleaned before it is used to wash dishes. Consider posting a sign.	1 day
252		X		Observed no self-closer on the restroom door adjacent to the kitchen. The door was a sliding accordion type.	3 weeks
413		X		Observed no self-closer on the exterior door in the front of the building. If there is not one on the back door it should be installed as well.	3 weeks
218		X		Observed the can opener producing small metal shaving and in need of cleaning. Repair or replace and clean before it is used again. Monitor closely until replaced.	2 weeks
355		X		Observed no utility or mop sink. Mop water should be discarded into plumbing and not outside. If a sink cannot be installed the toilet can be used and cleaned each time.	1 day
411		X		Observed no form of lighting in the storage shed. Mounted battery lights or a flashlight may be sufficient.	2 weeks
404		X		Observed gaps in the floor in the doorway from the back room to the kitchen. Fill gaps to prevent them from collecting crumbs or water.	2 weeks

Notes: 1) Establishment should have an employee health policy it reviews with staff. 2) Est. should have a spec sheet for the cleaning chemical and pump device that is used to clean ice cream hoses. 3) Est. plans to keep individual scoops in the ice cream containers and wash daily. 4) Est should check with the local municipality on grease trap requirements and determine if their building has one.
