Section #	C	NC	R	Narrative			To Be C	orrected	
254 187 411 218	X	x x x	X X	Observed a probe thermometer being used to measure air temperature in deli display cooler. I would recommend replacing it with a dial type for easy viewing. Observed probe thermometer reading 45F. I measured it at 44F. This cooler should remain at 41F or below. Deli meats and cheeses were moved to the walk-in cooler and should not be returned until the temperture is corrected. Observed a light bulb out over the grill in the fume hood. Observed ice accumulation below the walk-in freezer fan. Ice was freezing on packaged food. Food should be moved and replaced with pans to catch water until unit can be repaired. A box of brownies were voluntarily discarded. Freezer may need more frequent maintenace to prevent the accumulation of ice. Observed a bag of powdered sugar left open in the storage area. Observed a bowl in the powdered sugar. All scoops must have a handle and the if stored in the bulk food item it should be stored handle up and not touching the food. Cottacge cheese, Pasta salad and boiled eggs in the dispay case should be dated if kept over 24
