**Between Roads:** \_\_\_\_\_ **And:** \_\_\_\_\_

**Subdivision:** \_\_\_\_\_ **Lot Number:** \_\_\_\_\_

**Type of Drive:** \_\_\_\_\_ **Existing Drive Used For:** \_\_\_\_\_

Effective April 27, 2009, the Noble County Commissioners approved a Noble County Highway Driveway Ordinance, Ordinance Number 2009-2, amending Ordinance Number 2002-8. The property owner(s) should be aware that side ditches are necessary for the maintenance of county roads and it may be necessary that a pipe be placed under the driveway. The minimum pipe size/length under driveway approaches shall be 12 inches in diameter and 30 feet long. Side ditches must be constructed by the owner to allow unrestricted flow of water in the right-of-way. Any/all work done within the R-O-W (including landscaping) requires a permit. It is the property owner(s) responsibility to check for any designated wetland area, legal tile drains, and/or open legal ditches area at this driveway site location.

When placing an asphalt or concrete driveway, drive must be level with the road or a 1/2 inch below road level.

In the event, the marked area does not meet Noble County standards, Noble County reserves the right to relocate the stakes to the nearest satisfactory location as a suggested alternative. If the location is not satisfactory to the owner, a new location can be marked by the owner and an additional permit check can be performed.
