Post Hole Cross-section

Post in contact with the ground must be pressure.

12" diameter minimum hole

Hole Depth minimum based on height of sidewalls:
Up to 14 feet = 36" Deep
Up to 18 feet = 42" Deep
Above 18 feet = 48" Deep

Two uplift blocks required fastened to bottom of post opposite sides. Must use treated material and fasteners must be corrosion resistant.

12" diameter x 4" minimum thick cement cookie or equivalent engineered support required
