

## How to Download Data from Indiana Map

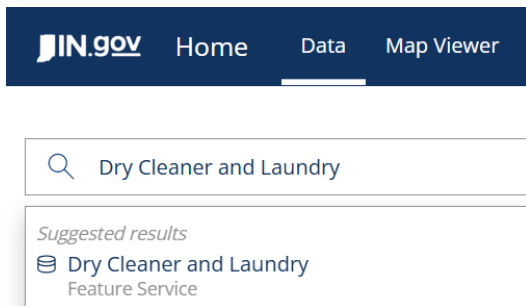

The Dry Cleaner and Laundry Feature Service consists of two layers. Dry Cleaner and Laundry (Location) layer and Dry Cleaner and Laundry Reference (Source Data).

Please use the following steps to download the Dry Cleaner and Laundry dataset layers.

- Navigate to the [IndianaMap](#) website.
- Click the Data tab at top.

- In the Search box, type Dry Cleaner and Laundry.

- Click on the Dry Cleaner and Laundry - Feature Service.
- This will take you to a summary of the dataset. It will also let you view the data source, view all metadata, or open in ArcGIS Online.
- To Download data, under “Layers”, click on each layer and choose the Download option. Please review the metadata to become familiar with the sources and limitations of this dataset.
- To open in Microsoft Excel or Google Sheets, use the csv (comma-separated value) download file option.
  - Click on “Download” under CSV, then “Request new file”. It may take a minute.
  - Once downloaded, open the .csv file. By choosing Save As, you can save it in several different formats including Microsoft Excel Workbook (.xlsx).
