

Brown County SWMD Business Cardboard Recycling Success

Brown County Solid Waste District, in an ongoing quest to secure more cardboard from local businesses, has made an agreement with the local IGA Grocery Store to collect its cardboard. Estimated annual volume is expected to be 120 tons. At current market prices this will bring in an additional \$11,400 to the District. This increased partnership with local businesses in Nashville has resulted in the District being up 25+ tons in cardboard collections for 2013.
