11. (Optional) Please provide a narrative summary of progress made toward EMS objectives and targets other than those reported as an Environmental Performance Initiative in Section E. You may limit the summary to environmental aspects that are *significant* and towards which *progress* has been made during the last calendar year. Attach additional sheets as necessary.

Environmental aspect	Progress made this year (e.g., quantitative or qualitative improvements, activities conducted)
Water Use	Further reduction in water usage of 20%.
Energy Use	<p>1/ Implemented an all Employee Awareness Idea Program. This program came about as a result of a six sigma study showing almost 100% of energy ideas came from engineers and consultants in the past. After further investigation, through the Six Sigma process, it was determined that getting all employees involved could produce extra project ideas and thus savings. To date sixty-eight (68) ideas have been generated. Some of those are repeats of earlier identified savings projects. But about 1/3 are new. One of those projects has been implemented to date, but others are in development.</p> <p>2/ In 2010 the site completed and implemented several other energy reduction projects (e.g. increasing the boiler efficiency, demolition of some unused buildings, variable feed drive at evaporator pump) adding up to approximately 22,700,000 KWH savings.</p>

SECTION D

ADDITIONAL INFORMATION

Why do we need this information?

This information will help IDEM to effectively manage the Environmental Stewardship Program.

What do you need to do?

Answer the questions as completely as possible.

- In addition to ESP, please list environmental awards received or voluntary programs participated in during the past twelve months.
 The site participates in the global Day of Service, a volunteer initiative to help address local community needs.
- Has your facility taken advantage of any ESP incentives? If so, please describe the implementation process and list additional benefits IDEM should consider.
 The site worked with the IDEM staff to develop a flexible air permit for the animal health manufacturing process. The permit was issued in October 2009. The site is now working with the IDEM on a Plantwide Applicability Limit (PAL) permit for Clinton labs.
- If your facility was not registered to the ISO 14001 standard prior to becoming an ESP member, has ESP helped you to pursue registration? If so, how has ESP been instrumental in achieving registration?
 At this point, the site is not pursuing ISO 14001 certification.
