LSIORB – Section 5 – East End Bridge

Summary of Indiana Open House

Tuesday, December 11, 2007

Utica Community Center, Utica, IN

4:00 PM – 7:00 PM

INTRODUCTION

An Open House for the East End Bridge was held on Tuesday, December 11, 2007 from 4:00 to 7:00 p.m. at the Utica Community Center in Utica, Indiana. The purpose of the Open House was to present aesthetic elements and architectural treatments that have been developed and selected for the East End Bridge in coordination with the Historic Preservation Advisory Teams and the Area Advisory Teams.

An e-mail invitation to the Open House was sent to the entire project database, numbering approximately 2,300 people. In addition, advertisements were placed in The Louisville Courier-Journal, the New Albany Tribune, and the Jeffersonville Evening News. There were print stories previewing the Open Houses as well as print coverage of the Utica Open House, given its status as the first of two basically identical events.

MEETING SETUP

The Open House was designed as a self-guided tour of displays, with no formal presentation. There was a greeting area where the guests were welcomed, asked to sign in, and given a meeting handout. The handout packet included the following:

- An introductory sheet with general information about the bridge, a list of the selected aesthetic elements, and a current construction plan;
- Contact information for the primary project team members;
- An overall project map showing the six (6) sections of the project;
- Renderings of various viewpoints of the bridge and aesthetic elements (same as the meeting display boards); and
- A comment sheet.

The meeting guests were then invited to view the display boards. There were two (2) sets of three (3) exhibit boards that illustrated the aesthetic elements and current design of the bridge. These included:

- Large renderings of the bridge from several viewpoints, including the upstream, Kentucky shoreline, and walkway views;
- Smaller renderings of the plan and profile of the bridge and the bridge approaches; and

- Renderings of some of the bridge details, such as the tower, cable tie-downs, anchor piers, walkway railings, protective barrier at the roadside, light poles and fixtures, and the underneath side of the bridge deck.

There were also two (2) display boards provided by the GEC. One display showed an aerial photograph of the entire project area, including the Downtown and East End Bridge locations and approach alignments. The second display board showed a larger scale aerial photograph of the East End Bridge location and approaches.

Members of the SDC5 project team were available to answer questions about the East End Bridge. Members of SDC6 were also present to answer questions about the Indiana approach. Members of the Bi-State Management Team and the GEC were present to answer any general questions about the project as a whole.

MEETING PARTICIPATION

66 members of the public signed-in at the Open House. The sign-in sheets are attached. An additional 16 members of the project team attended the Open House, including the following:

Paul Boone	Indiana Department of Transportation
Brent Lewis	Indiana Department of Transportation
Carl Percy	Indiana Ombudsman
Jim Hilton	GEC (Community Transportation Solutions)
Sam Raies	GEC (Community Transportation Solutions)
Chris Jones	GEC (Community Transportation Solutions)
Steve Slade	SDC5 (PB Americas)
Mike Baron	SDC5 (PB Americas)
Dennis Baron	SDC5 (PB Americas)
Ernest Fernandez	Rosales + Partners
John Carr	SDC5 (Wilbur Smith Associates)
Samantha Wright	SDC5 (Wilbur Smith Associates)
Gary Elder	SDC5 (New West)
Shalondra Jackson	SDC5 (New West)
Donna Wade	SDC5 (New West)
Scott Sondles	SDC6 (Burgess & Niple)

A total of 3 comment forms were returned either during or following the Indiana Open House. The following comments were received in response to the question, "Please provide any general comments you may have regarding the aesthetic elements that have been selected for the East End Bridge":

- Build it.
- Very exciting and beautiful concept. It can't happen too soon. The bridge itself will not only provide enormous relief from the current terrible congestion at the I-65 Kennedy Bridge, but will also be a fascinating tourist attraction. Please break ground soon.
- #1 it is beautiful. Openness and width; warm soft colors; accommodations for walkers and bikers; approaches to the bridge and bridge in regard to the softer lighting.

LSIORB – Section 5 – East End Bridge

Summary of Kentucky Open House

Thursday, December 13, 2007

Springdale Community Church, Louisville, KY

4:00 PM – 7:00 PM

INTRODUCTION

An Open House for the East End Bridge was held on Thursday, December 13, 2007 from 4:00 to 7:00 p.m. at the Springdale Community Church in Louisville, Kentucky. The purpose of the Open House was to present aesthetic elements and architectural treatments that have been developed and selected for the East End Bridge in coordination with the Historic Preservation Advisory Teams and the Area Advisory Teams.

An e-mail invitation to the Open House was sent to the entire project database, numbering approximately 2,300 people. In addition, advertisements were placed in The Louisville Courier-Journal, the New Albany Tribune, and the Jeffersonville Evening News. There were print stories previewing the Open Houses in Utica (12-11-07) and Louisville (12-13-07).

MEETING SETUP

The Open House was designed as a self-guided tour of displays, with no formal presentation. There was a greeting area where the guests were welcomed, asked to sign in, and given a meeting handout. The handout packet included the following:

- An introductory sheet with general information about the bridge, a list of the selected aesthetic elements, and a current construction plan;
- Contact information for the primary project team members;
- An overall project map showing the six (6) sections of the project;
- Renderings of various viewpoints of the bridge and aesthetic elements (same as the meeting display boards); and
- A comment sheet.

The meeting guests were then invited to view the display boards. There were two (2) sets of three (3) exhibit boards that illustrated the aesthetic elements and current design of the bridge. These included:

- Large renderings of the bridge from several viewpoints, including the upstream, Kentucky shoreline, and walkway views;
- Smaller renderings of the plan and profile of the bridge and the bridge approaches; and
- Renderings of some of the bridge details, such as the tower, cable tie-downs, anchor piers, walkway railings, protective barrier at the roadside, light poles and fixtures, and the underneath side of the bridge deck.

There were two (2) display boards provided by the GEC. One display showed an aerial photograph of the entire project area, including the Downtown and East End Bridge locations and approach alignments. The second display board showed a larger scale aerial photograph of the East End Bridge location and approaches.

SDC4 also provided display boards of the Kentucky approach to the East End Bridge.

Members of the SDC5 project team were available to answer questions about the East End Bridge. Members of SDC4 were also present to answer questions about the Kentucky approach. Members of the Bi-State Management Team and the GEC were present to answer any general questions about the project as a whole.

MEETING PARTICIPATION

68 members of the public signed-in at the Open House. The sign-in sheets are attached. An additional 20 members of the project team attended the meeting, including the following:

George Jones	FHWA
Paul Boone	Indiana Department of Transportation
Matt Bullock	Kentucky Transportation Cabinet
Jadie Tomlinson	Kentucky Transportation Cabinet
Lee Douglas Walker	Kentucky Ombudsman
John Sacksteder	GEC (Community Transportation Solutions)
Sam Raies	GEC (Community Transportation Solutions)

December 11, 2007

Section 5 – East End Bridge

Welcome to the open house for the East End Bridge over the Ohio River for the presentation of aesthetic elements and architectural treatments that have been developed and selected in coordination with the Historic Preservation Advisory Teams and the Area Advisory Teams.

General information about the current design of the bridge includes:

- 5-Span Cable-Stayed Bridge with Needle Towers and Median Cables
- Length of East End Bridge: 2,510 feet (225.5' – 412' – 1235' – 412' – 225.5')
- Width of Bridge: 154.5 feet (3 lanes in each direction with 12' shoulders)
- Walkway / Bikeway on downstream side of bridge (17' wide)
- Towers extend 300 feet above normal pool of Ohio River

Aesthetic elements that have been selected:

- Overall Aesthetic Theme: Curvilinear
- Color: Warm Grey for color of cables, steel box, light poles, luminaires, railings, and any other secondary metal elements.
- High quality architectural uncoated concrete will be used.
- KY Approach structure to East End Bridge will have the same selected architectural treatments above the bridge deck, i.e. same barrier walls, railings, color, roadway lighting, etc.

Current plan for construction:

- Begin construction in 2009
- Complete construction in 2014

Please provide any general comments you may have regarding the aesthetic elements that have been selected for the East End Bridge.

Very exciting & Beautiful concept. It can't happen too soon. The bridge itself will be not only provide enormous relief from the current terrible congestion at the I-65 Kennedy Bridge, but will also be a fascinating tourist attraction. Please break ground soon!

J. Mark F. ischere

Section 5 - East End Bridge

Please provide any general comments you may have regarding the aesthetic elements that have been selected for the East End Bridge.

#1 it is beautiful
openness and width
warm soft colors
accommodations for walkers and bikers
approaches to the bridge and bridge
in regard to the softer lighting
