

Reporting in the School Nurse Module

The CHIRP School Nurse Module hosts an array of useful reports, each designed to highlight specific aspects of your school's immunizations profile. These reports meet needs specific to school nurses such as providing immunizations guidance to individual students in need of one or more doses. Here are descriptions of each report module with examples of use cases and information for how each report interprets CHIRP data.

	School Aggregate Report	School Immunization Report	Action Report	Student Detail Report
Scope	Contains both school-level and student-level data	Contains school-level data	Contains student-level data	Contains student-level data
Data reported	Reports individual status with aggregate totals	Reports total vaccinated for chosen grades	Reports only for students who require one or more dose	Reports all vaccination details for all students
Evaluation criteria	ACIP guidelines	IN State guidelines	ACIP guidelines	ACIP guidelines

LMS: INvest

LMS: Invest, our learning management platform hosts trainings that pertain to immunizations. 'School Nurse Immunizations 2025' is a new module that covers immunization schedules, Indiana Codes for immunizations, specific rules like the 4 Day Grace period and Grade-Based versus Age-Based requirements, and details on exemptions.

FAQ for School Nurses

This document is an excellent resource for accepting immunization records and evidence of immunity, utilizing vaccine schedules and catch up guidance, understanding exemptions, and CHIRP guidance. It also contains the data reporting component of school immunizations and information on accepting vaccines from other countries.
