

2024 Temporary Adjusted Weighted Caseload Measures

(Amended 7/25/25)

Indiana's weighted caseload measures system is intended to apply only to new case filings. Until the Temporary Adjusted Weighted Caseload Report was created, all reports reflected trial court utilization statistics based solely on the number of new cases filed in each court. Each year, the baseline utilization figures shift somewhat during the year due to the transfer of cases among the courts (because of change of venue from the county or the judge and judicial recusals), and other shifts of judicial time and cases.

For 2024, we have calculated the temporary, adjusted weighted caseload utilization figures. The temporary adjusted statistics have been calculated by:

- Adding to the court's total minutes the cases in which the reporting judge assumed jurisdiction as a special judge.
- Adding to the court's total minutes the venued in and transferred in cases.
- Subtracting from the court's total minutes the number of cases in which another judge assumed jurisdiction as a special judge.
- Subtracting from the reporting court's total minutes the venued out and transferred out cases.

The information in the "Temporary Adjusted Weighted Caseload Report" does not change the fundamental filing patterns in the trial courts. It reflects some of the ways that courts shift caseloads and resources, sometimes in order to deal with uneven caseloads. Because these shifts are temporary, they should only be used as an additional reference and not as the baseline for weighted caseload statistics. The temporary data is reported so that courts could see how the shifting of caseloads and judicial officer resources actually played out in 2024.
