Indiana ESP facilities must submit an Annual Performance Report (APR) by **April 1st** of every year, for each calendar year in which the entity has been a member for at least three (3) full months. Membership terms are renewed every four (4) years through submitting your APR. Your APR should be reviewed and signed by a senior manager at your facility prior to submittal. Once signed, e-mail the APR to IDEM at esp@idem.IN.gov. Please do not include any confidential business information in your annual performance report. **Public access laws require IDEM to make the APR publicly available**, which may include posting all portions of your report on the Indiana ESP Web site. If you have any questions, please contact IDEM at esp@idem.IN.gov or (800) 988-7901.

This form will also be used for ESP members who are also members of the Indiana Partners for Pollution Prevention Program to recertify their membership and reaffirm their commitment to the Partners Pledge.

SECTION E

ENVIRONMENTAL IMPROVEMENT INITIATIVE RESULTS

Why do we need this information?

Facilities need to share the results of the environmental improvement initiative that was pursued during the reporting period. IDEM needs to report cumulative program reduction results.

What do you need to do?

Reference Section F for "Category" and "Indicator" options to complete this section. Summarize your facility's progress on achieving the initiative you identified in the application or last year's APR. For assistance, please call (800) 988-7901 or email esp@idem.IN.gov.

Initiative #1

Category 1: Electricity Indicator 1: kWh/unit	Baseline (indicate measurement unit)	Current (indicate measurement unit)	Cost Savings
Calendar year	2015 2019	2020	
Actual quantity (per year)	26,316,000 31,076,000	25,770,596	
Production unit (select one)	Earned Labor Hours X Production units Production lbs. Other -- specify (e.g. Gallons, length, etc.)		
Production Quantity	34,386 43,526	34,096	NA
Normalization factor (Current year production ÷ Baseline year production) 0.992 0.783			
Normalized quantity (Actual current year quantity - Actual baseline quantity) x Normalization factor -541,040.77 4,155,977 kWh			

Briefly describe how you achieved improvements for environmental initiative #1 or, if relevant, any circumstances that delayed progress. This reduction does not take into account the lost production in March, April and May of 2020 due to COVID-19. But improvements in lighting control, shutting down equipment after production hour and improvements in the compressed air system have led to electrical use reductions. In the above reported electrical use, 7,904,800 kWh's of wind energy was purchased reducing TMH's carbon footprint.

Initiative #2

Category 2: Natural Gas Indicator 2: Decatherm /unit	Baseline (indicate measurement unit)	Current (indicate measurement unit)	Cost Savings
Calendar year	2018 2019	2020	
Actual quantity (per year)	146,804 156,497	110,615	

Production unit (<i>select one</i>)	Earned Labor Hours X Production units Production lbs. Other -- specify (e.g. Gallons, length, etc.)		
Production Quantity	46,922 43,526	34,096	NA
Normalization factor (Current year production ÷ Baseline year production) 0.727 0.783			
Normalized quantity (Actual current year quantity - Actual baseline quantity) x Normalization factor -26,309.40 35,941.57 deka therms			
Briefly describe <i>how</i> you achieved improvements for environmental initiative #2 or, if relevant, any circumstances that delayed progress. This reduction does not take into account the lost production in March, April and May of 2020 due to COVID-19. TMH has reduced the office and plant temperatures during the heating months. There is also increased control of all overhead doors throughout the campus.

Initiative #3

Category 3: Indicator 3:	Baseline (indicate measurement unit)	Current (indicate measurement unit)	Cost Savings
Calendar year			
Actual quantity (per year)			
Production unit (select one)	Earned Labor Hours Other -- specify (e.g. Gallons, length, etc.)	Production units	Production lbs.
Production Quantity			NA

Normalization factor (Current year production ÷ Baseline year production)

Normalized quantity (Actual current year quantity - Actual baseline quantity) x Normalization factor

Briefly describe *how* you achieved improvements for environmental initiative #3 or, if relevant, any circumstances that delayed progress.

1. Briefly describe the *impacts or wastes* eliminated resulting from the environmental initiative(s). If multiple initiatives, please indicate which specifically.

TMH has worked to teach Associates to turn off any equipment we can once production is done and at breaks to reduce energy waste. We are continuing to fine tune lighting reductions, compressed air leaks and compressor efficiency. TMH is looking for opportunities to move away from pneumatic tools where ever possible. Plus the weld fume capture is beginning to allow us to reduce air turn over in the winter, lowering heating cost due to returning the air back into the plant instead of venting it outside. TMH is installing VFD motors when equipment is replaced where ever feasible.

2. Are there other best management practices (BMPs) you can share correlating to your initiative(s)?

Looking for opportunities to idle equipment during the day when product is not actually in that process.

3. If the objectives and targets associated with the environmental improvement initiative(s) were not attained, please verify continued progress toward the environmental initiative(s). If multiple initiatives, please indicate which specifically.

TMH increased the paint thickness on its trucks to address quality issues causing increased VOC's. We have initiated an Environmental Management Program to work to reduce the amount of hazardous waste generated to help off set this increase.

4. Please provide a narrative summary of progress made toward *qualitative, significant* EMS objectives and targets, if any.

1. Shutting more equipment down after production.
2. Keeping overhead doors closed when the outside temperature is below 60 degrees and reducing the temperature set point during heating months.
3. Continue to reduce plant air turnover during the winter through better weld, laser and plasma dust capture.
4. Work to reduce Hazardous Waste and VOC generation.
5. Purchasing wind energy to off set electric CO2 production and improved air leak reduction efforts.

5. Please list any state, U.S. EPA, or other partnership programs to which you are reporting this data (e.g., Energy Star, Project XL).

Partners for Pollution

6. Is your entity willing to share the environmental improvement initiative(s) and its best management practices (BMPs) at the ESP Annual Meeting and/or a Partners for Pollution Prevention quarterly meeting or conference? ☐ Yes ☐ No
