SHEET NO.	DESCRIPTION
-----------	-------------

[illegible]

**	All earth shoulders, median areas, and cut and fill slopes shall be plain or mulched seeded except where sodding is specified.
	The final cross sections of the grading contract will be the original cross sections of the paving contract. However, partial or complete cross sections shall be taken if necessary to determine the actual excavation quantities.
	The paper relocation will be cross sectioned by the Engineer before construction.
	Existing asphalt pavement located outside the construction limits, between Sta. and Sta. , shall be removed as directed.
	The quantity of peat excavation shown on the plans has been estimated on the basis of theoretical cross sections by using treatment of existing fills, treatment by removal, or treatment by displacement, where each treatment applies.
	Contractor shall verify the existing flowline elevation to set the appropriate sump depth on structures designed with sump.
