NATIONAL DEBT CRISIS

National Debt Crisis

Indiana provides a meaningful model of fiscal responsibility

- A long-term plan is needed to restore America's financial solvency
- National Debt is \$36 trillion and over \$100,000 per capita
- Interest alone exceeds the annual budgets for the U.S. Military (\$820B) and Medicare (\$839B)
- Leading the National Debt Crisis Taskforce for state financial officers supporting Congress and our President to:
 - 1) Spend less in 2025 than was spent in 2024
 - 2) Create a path to a balanced budget as soon as possible
 - 3) Unleash economic growth, become energy dominant and institute a timeline for reducing the debt empowered by additional tax revenue
