

Mike Braun
Governor

Lindsay M. Weaver, MD, FACEP
State Health Commissioner

July 1, 2025

Dear parent/guardian:

The Indiana Department of Health (IDOH) believes that protecting Indiana's citizens from vaccine-preventable diseases is one of the most important roles of public health. [Indiana Code \(IC\) 20-34-4-2](#) charges IDOH to set and publish vaccine requirements for school entry for children attending accredited public and private schools in our state.

Indiana began experiencing a Hepatitis A outbreak in November 2017 that resulted in hospitalizations and deaths. In July 2019, a school vaccine requirements advisory group that included the Indiana Department of Health-Immunization Division, the Indiana Department of Education, the Indiana Association of School Nurses, the Indiana Immunization Coalition, and the Indiana Chapter of the American Academy of Pediatrics unanimously agreed to require two valid doses of hepatitis A vaccine for all grades, including schools with pre-kindergarten programs, beginning in the fall of the 2020-2021 school year.

The hepatitis A vaccine is a two-dose series that is routinely recommended beginning at 12 months of age. This two-dose series requires at least six months between doses. This vaccine series is safe and effective at preventing hepatitis A, a highly contagious viral liver infection. Please make an appointment with your healthcare provider to begin and/or complete the series for your child. We encourage you to discuss any other age-appropriate vaccines for your child that may be needed to protect them from disease and cancer, including influenza, human papillomavirus (HPV), meningitis B, and COVID-19.

IDOH has an online tool that allows individuals to access their immunization records called MyVaxIndiana (myvaxindiana.in.gov). This tool enables individuals to view and print their immunization records after validating them with either phone number or email.

Thank you for taking steps to protect your child and our community from vaccine-preventable diseases. Your commitment to keeping children healthy helps ensure a safer learning environment for everyone.

To **promote**, **protect**, and **improve** the health and safety of all Hoosiers.
