

SR 46 Pavement Replacement Project (Columbus, IN)

Public Meeting | August 10, 2026

Need

- Deteriorating pavement
- Lack of sidewalk connectivity
- Non-compliant ADA curb ramps
- Deteriorating storm sewer system
- Insufficient curb height

Purpose

- Improve pavement conditions to provide service life improvement
- Improve pedestrian access
- Provide ADA compliant curb ramps
- Promote effective roadway drainage

Preferred Alternative

The most fitting pavement option will be applied to each specific roadway segment, as noted below.

Pavement Maintenance

(State Street / State Road 46, Lindsey Street, Old State Road 46)

- Remove and replace top layer of asphalt
- Provide ADA compliant curb ramps
- No drainage improvements

Pavement Rehabilitation

(2nd Street / State Road 46, 3rd Street / State Road 46)

- Fully remove and replace existing pavement
- Provide ADA compliant curb ramps
- Replace insufficient height curb
- Add sidewalk on southside of 2nd Street from Sycamore Street to Central Avenue
- Drainage improvements

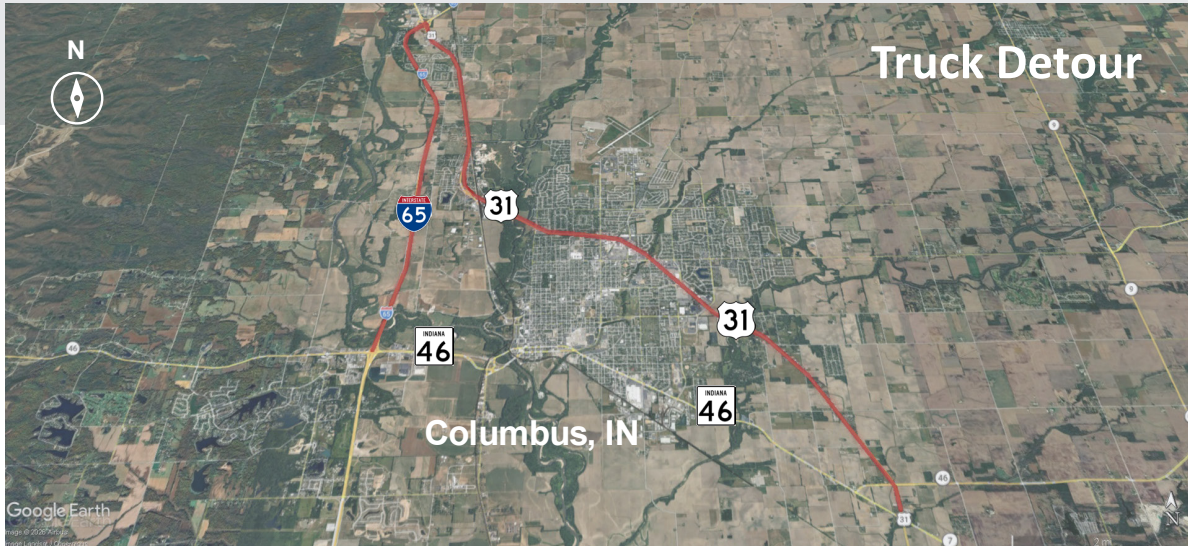

What to Expect During Construction

Before Construction

- Public Information Meeting Held
- Project Website
- Coordination meetings with downtown businesses closer to construction
- Continued coordination with City and EMS officials

During Construction

- Media Plan
- Temporary sidewalk and crossings
- Advance signing
