POLYMERS AND AGGREGATES FOR OVERLAY SYSTEMS

Specification Reference:

SM Material Code:

Part 1: 738-B-297

Part 1: 909M11020 - Epoxy Polymers

Part 2: 738-B-297

Part 2: 904M06270 - Aggregates

Part 1. Epoxy Polymers for Polymer Overlay Systems

Specification Reference: 738-B-297

SM Material Code: 909M11020

The epoxy polymer used in multi-layer type concrete bridge deck overlay shall be a two-component material consisting of an epoxy resin base and hardener in accordance with ASTM C881, Type III, Grade 1, Class C and the INDOT exceptions.

Part 2. Aggregates for Polymer Overlay Systems

Specification Reference: 738-B-297

SM Material Code: 904M06270 - Aggregates for Polymer Overlay Systems

The aggregate used in multi-layer type concrete bridge deck overlay shall be in accordance with 904.02 and the INDOT exceptions. It shall be one of the following: Aluminum oxide; Basalt; Calcined bauxite; Crushed granite; Flint; or Glacial gravel.

The aggregate shall be clean, dry, free of dirt, clay, asphalt, and other foreign or organic materials. All aggregate shall be delivered to the project site in sealed waterproof bags or containers.
