**Disclaimer:** Information for this report comes from an extract of EPA's National Emission Inventory (NEI) database. Data were extracted in August 2005 from the Final 1999 NEI Version 3. NEI is an emissions database developed by EPA. It is based partially on emission data obtained from State and local agencies, but it is not a database of official State emissions data. Please contact the appropriate State agency to obtain information on a State's official emission inventory. Please contact EPA to report errors.

Readers are cautioned not to infer a qualitative ranking order of geographic areas based on AirData reports. Air pollution levels measured in the vicinity of a particular monitoring site may not be representative of the prevailing air quality of a county or urban area. Pollutants emitted from a particular source may have little impact on the immediate geographic area, and the amount of pollutants emitted does not indicate whether the source is complying with applicable regulations.

**Disclaimer:** Information for this report comes from an extract of EPA's National Emission Inventory (NEI) database. Data were extracted in August 2005 from the Final 1999 NEI Version 3. NEI is an emissions database developed by EPA. It is based partially on emission data obtained from State and local agencies, but it is not a database of official State emissions data. Please contact the appropriate State agency to obtain information on a State's official emission inventory. Please [contact EPA](#) to report errors.

Readers are cautioned not to infer a qualitative ranking order of geographic areas based on AirData reports. Air pollution levels measured in the vicinity of a particular monitoring site may not be representative of the prevailing air quality of a county or urban area. Pollutants emitted from a particular source may have little impact on the immediate geographic area, and the amount of pollutants emitted does not indicate whether the source is complying with applicable regulations.

Emissions Report Lafayette, IN Area						
	2001 Area Source Emissions (Tons Per Year)					
	PM 2.5	% of MSA	SO2	% of MSA	NOX	% of MSA
Benton Cty	963	20.1%	87.6	3.9%	958	7.9%
Carroll Cty	122	2.5%	1348	60.2%	1639	13.5%
Clinton Cty	1495	31.2%	166	7.4%	2434	20.1%
Tippecanoe Cty	2216	46.2%	638	28.5%	7100	58.5%
Total	4796		2239.6		12131

**Disclaimer:** Information for this report comes from an extract of EPA's National Emission Inventory (NEI) database. Data were extracted in August 2005 from the Final 1999 NEI Version 3. NEI is an emissions database developed by EPA. It is based partially on emission data obtained from State and local agencies, but it is not a database of official State emissions data. Please contact the appropriate State agency to obtain information on a State's official emission inventory. Please contact EPA to report errors.

Readers are cautioned not to infer a qualitative ranking order of geographic areas based on AirData reports. Air pollution levels measured in the vicinity of a particular monitoring site may not be representative of the prevailing air quality of a county or urban area. Pollutants emitted from a particular source may have little impact on the immediate geographic area, and the amount of pollutants emitted does not indicate whether the source is complying with applicable regulations.

**Disclaimer:** Information for this report comes from an extract of EPA's National Emission Inventory (NEI) database. Data were extracted in August 2005 from the Final 1999 NEI Version 3. NEI is an emissions database developed by EPA. It is based partially on emission data obtained from State and local agencies, but it is not a database of official State emissions data. Please contact the appropriate State agency to obtain information on a State's official emission inventory. Please contact EPA to report errors.

Readers are cautioned not to infer a qualitative ranking order of geographic areas based on AirData reports. Air pollution levels measured in the vicinity of a particular monitoring site may not be representative of the prevailing air quality of a county or urban area. Pollutants emitted from a particular source may have little impact on the immediate geographic area, and the amount of pollutants emitted does not indicate whether the source is complying with applicable regulations.
