Re: 2023 Lake County Land Order Report

Date: September 12, 2023

The Lake County Land Order Review is the result of a petition filed on August 1, 2023 by Mr. Andy Young. The petition also included signatures of approximately an additional 160 taxpayers in the county. This review is being held in accordance with IC 6-1.1-4-13.6(d) in which Mr. Young has requested the DLGF complete a review of the 2023 Land Order in which he was able to obtain signatures of at least one hundred (100) property owners who also wished to be included in this petition.

I have completed my review of the 2023 Land Order which primarily focused on Calumet Township, however, I did review the land order in other townships in both Residential and Commercial property classes.

I want to first mention that this review is being based on information that has been provided by the Lake County Assessor's office to support the new land order values. The petitioner, Mr. Young, as of this writing has not submitted any specific information / documentation to support why he has requested this review or what his specific disputes are with the land order. Also, none of the other petitioners that signed on to be a part of Mr. Young's petition has submitted any information. Also, this review was conducted based upon the information supplied to me by the Lake County Assessor, there were no field visits or inspections done on any of the parcels.

The county's 2023 land order was part of the current four (4) year cyclical plan. This land order was done and was implemented in the first year of the 4 year cycle. The new land base rates were implemented for the January 1, 2023 assessment date. The new land order has been submitted to the Lake County PTABOA as required under IC 6-1.1-4-13.6.

The initial supporting documentation was provided to the Department on August 22, 2023 by LaTonya Spearman which included the following labeled Exhibits.

Exhibit 1- The 2023 land order submitted to the PTABOA.

Exhibit 2 – Neighborhood counts (This shows the neighborhood, parcel count, sold count, % of neighborhood sold, along with the ratios for land to sale.)

Exhibit 3- 21_22 sales (all sales, vacant and improved, for each township; broken down by neighborhood with ratios for land to sale amounts)

Exhibit 4- Calumet land order with additional information (the previous appeal focused primarily on Calumet Township's land values, comments included here provide additional context)

Note: In reviewing the above documentation, I noted the county had not provided a listing of parcels owned by Mr. Young as well as any sold parcels. A request was made for this information, with the information being provided to the Department by LaTonya Spearman on August 31, 2023.

This is a note from LaTonya which accompanied the two exhibits mentioned below: As you will note, information for Mr. Nowacki was also included. In the "All Properties…" spreadsheet, the highlighted properties were owned by Mr. Young as of January 1, 2023 and sold in March 2023 as indicated on the Sales Summary. In the "Sales Summary…" spreadsheet, Spasov was the buyer of all the parcels that were sold in the multi parcel sales. Since these were multi parcel sales, there were no sales prices per parcel. The total sales price was divided by the total acreage to calculate a price per acre. The price per acre was then multiplied by the acreage for each parcel to calculate an approximate price per parcel.

Exhibit 5 – List of parcels owned by Mr. Young and Mr. Nowacki as of January 1, 2023.

Exhibit 6 – List of parcels sold by Mr. Young & Mr. Nowacki.

My first step as part of my land order review was to review each of the county submitted land order exhibits.

1. Exhibit 1 - I reviewed this Exhibit which specifically compared the 2022 and 2023 land values by neighborhood. For each neighborhood there were sub land rates established for the land type and pricing method for each neighborhood.

2. Exhibit 2 - I reviewed this Exhibit which listed the parcels counts, sale counts and % sales sold within each neighborhood. The Exhibit also listed the land value % to total AV for each neighborhood.

3. Exhibit 3 - I reviewed this exhibit which listed the 2021 and 2022 sales used in the land rate development. On this exhibit I selected at random 10 sales in Calumet and an additional 10 sales in the other townships. Once selected I verified each sales price to the parcel sales information from the county website. Concerning the 2023 assessed values listed, this was reconciled to the 2023 ratio study workbook. Of all the parcels

tested, I found no problems with the listed sales price and the assessed value information. The AV information was verified to the 2023 ratio study workbook. I also was able to reconcile the land base rates as shown on the 2023 PRC to the Exhibit 1 2023 land base rate.

4. Exhibit 4 – I reviewed this exhibit which listed the detail of each 2021/22 sale along with the notes on each sale. I did a random test of sales shown on the sales file as not valid for trending, and on these sales, they did not appear to be included in the sales used in the 2023 land order development.

Comparison of 2023 and 2022 Land Order Values:

The county competed land orders in 2022 and 2023, one of the steps I conducted was to complete a review of the current land order to determine the percentage of neighborhoods in which the proposed new land rate either remained unchanged, increased or decreased from the prior year land order. For each neighborhood there were sub land rates established for the land type and pricing method for each neighborhood. This analysis countywide showed that 75.9% of the neighborhood values remained unchanged on the new land order. In Calumet Township, the analysis showed that 64% of the neighborhoods did not change, with the highest township of no change values being Center at 98.6%. The N/A on the spreadsheet mostly refers to new neighborhoods in 2023 that did not exist in the 2022 land order. (Please refer to Department Exhibit 1 which summarizes the above categories for each township)

2023 Ratio Study Analysis:

Since the land values are to reflect market value in use, I reviewed the 2023 Lake County Ratio Study detail. Since most of Mr. Young's parcels are in Calumet Township, my review of the ratio study mostly focused on this township. In Calumet Residential Vacant class, there were 24 sales used in the ratio study and in Residential Improved there were 1,337 sales used. In Commercial Improved class there were 54 sales used. The ratio study statistics showed the Median, COD and PRD was statistically within the IAAO standards. (Please refer to Department Exhibit 2 which shows the statistics for each township by major class)

In Residential Vacant class a ratio study was completed for the following townships: Calumet, Cedar Creek, Center, Hanover, Hobart, North, St. John and Winfield. In each of these townships the median, COD & PRD calculated statistics were within the IAAO standards.

In Residential Improved class a ratio study was completed for every township. In each of these townships the median, COD & PRD calculated statistics were within the IAAO standards.

In Commercial Improved class a ratio study was completed for the following townships: Calumet, Cedar Creek, Center, Hanover, Hobart, North, St. John and Ross. In each of these townships the median, COD & PRD calculated statistics were within the IAAO standards. This shows that the calculated 2023 land values are correct based upon market value in use evidence. In Commercial Vacant class the townships of Center, North and Ross had the

required five (5) minimum sales to complete a ratio study. The statistics were within the IAAO standards.

Based upon the above ratio study analysis, I was able to determine the 2023 assessments based upon valid sales data reflected the market value of use of the properties are in accordance with the IAAO statistical standards.

I also reviewed the ratio study analysis assessed value detail report which listed the total AV's by township and major class and showed the % change. The county provided explanations for those townships that changed by greater than 10%. Those explanations have been reviewed. To summarize the reasons provided for the change greater than 10%, in residential classes (improved and vacant) the primary reason for the increase was land order changes, trending, new construction and parcels being taken out of developer discount pricing. In the Calumet Commercial Improved class, the greater than 10% was explained by the county as being attributed to a new casino along with new parcels. Increases greater than 10% in other townships were explained as being new parcels, land order changes and new construction.

I also reviewed the PIVOT table report which analyzes the percentage change of each parcel in the workbook. In the residential vacant class, 16% of the parcels more than doubled in value between 2022 and 2023. The county was asked to explain this. *Response: 1360 of them were new parcels; about 300 were parcels in developer (discounted) rate last year and had land type changed when transferred to individual. The remainder were in Calumet township, which increased due to the land order*.

Properties owned / sold by Mr. Young:

I also reviewed Exhibits 5 and 6 mentioned above which was a listing of parcels owned by Mr. Young as of January 1, 2023 along with list of sold parcels. Based upon the county provided listing, Mr. Young (or related companies) owned 1,464 parcels on the assessment date.

Regarding the properties sold by Mr. Young (or his related companies) during 2022 & 2023, the assessed value of those properties were $283,200 compared to a total sales price of $4,620,472. Based upon the provided listing, 2 of the sales were multi parcel sale properties, one included 31 and the other 132 parcels. I did complete a sample test of a few of the sold properties and was able to verify the assessed values shown on the report reflected the 2023 assessed values.

County Exhibit 3 Test:

Concerning this exhibit, I completed a test of 10 parcels in Calumet and an additional 10 in the other townships. As mentioned above for this exhibit, the sales price was verified to the county GIS system and the AV of each parcel reconciled to the workbook. Once we had access to the 2023 property record cards, these parcels were reconciled to the 2023 PRC. As shown on the exhibit, I found 3 parcels in which there was a difference between the workbook value and the PRC. These are noted on the exhibit. (Please refer to Department Exhibit 3 which shows the test of parcels sales price, workbook AV and PRC detail)

Review of 2023 Property Record Cards:

Concerning the review of the county property record cards, when I accessed the county website, I determined only the 2022 property record cards was on the website, the county has not yet uploaded the 2023 PRC information. This was an initial concern so after a discussion with the county and its software vendor, they were able to provide the Department using an FTP site, an upload of all the 2023 PRC's. This made it cumbersome to find a specific PRC as you were not able to do a parcel # search like you could in the county website. I'm not sure if not having the most current PRC information uploaded and available on the county website is a concern or not, however I wanted to bring this up based upon the 2022 legislation contained in HEA 1260-2022.

I. Property Record Cards

On March 21, 2022, Governor Eric J. Holcomb signed into law House Enrolled Act 1260-2022 ("HEA 1260"). Section 8 of HEA 1260 specifies that county assessing officials must provide electronic access to property record cards on the county's official website. This means that beginning July 1, 2022, taxpayers' official Indiana Residential Property Record Card (State Form 50055), Indiana Commercial and Industrial Property Record Card (State Form 50056), and Indiana Agricultural Property Record Card (State Form 50057) must be available on the county website or through the county's geographic information system website.

In conclusion, after completing my review of the 2023 Lake County Land Order I could not find issues with the new land order values. The best evidence to show whether the land values and total AV of improved properties are accurate based upon mass appraisals, was to review the results of the 2023 Ratio Study. This analysis shows the assessed values of the properties reflect market value in use as all the statistics are within the IAAO standards for all property classes.

If the taxpayers in Lake County contend their individual assessments are incorrect, the issue needs to be handled through the appeals process as outlined in IC 6-1.1-15. Also, I would like to point out that if a petitioner wants to petition the new land order, they should be required at the time of petition filing, to provide specific evidence disputing those values.

Should you have any questions or need any additional information after reviewing my report please let me know.

Respectfully submitted,

John Toumey, Field Representative

RE: Preliminary Lake County Land Order 2023 Review Report

DATE: Sep 18, 2023

I have completed my review of the 2023 Lake County Land Order which was done as a result of the petition filed by Mr. Andy Young. About 100 petitioners have also submitted their signatures in addition to Mr. Young.

This review has been carried out based on the information provided by the County Assessor's office. The following documents were initially submitted by the office:

	Description of the Exhibits
Exhibit 1- 2023 Land Order Lake County.xlsx	Neighborhood Codes, Land Type, Classification, Pricing Method, 2022 and 2023 Rates (Low and High), % change
Exhibit 2- Neighborhood counts.xlsx.	Neighborhood Code, # of Parcels, # of Sales, % Sold, Assessed Value/Sales Price (Vacant Land Sales), Land AV/SP (Improved Sales)
Exhibit 3- 21_22 Sales by neighborhood.xlsx.	All sales (With each Township on a separate tab) with the Neighborhood Codes, Current land, AV and Sales Prices.
Exhibit 4- Calumet land order with additional info.xlsx.	With Additional columns added such as the rate, factors and the Proposed rate for 2023.

John Toumey, my esteemed colleague, requested a listing of parcels owned by Mr. Young, the petitioner as well as any sold parcels within the last two years that he previously owned and the Lake County Assessor, LaTonya shared that information along with a notation that read, "All Properties…" spreadsheet, the highlighted properties were owned by Mr. Young as of January

1, 2023 and sold in March 2023 as indicated on the Sales Summary. In the "Sales Summary…" spreadsheet, Spasov was the buyer of all the parcels that were sold in the multi parcel sales. Since these were multi parcel sales, there were no sales prices per parcel. The total sales price was divided by the total acreage to calculate a price per acre. The price per acre was then multiplied by the acreage for each parcel to calculate an approximate price per parcel.

Additional Documents submitted:

	Description of the Exhibits
Exhibit 5 - All Properties Young - Nowacki 2023	List of parcels owned by Mr. Young and Mr. Nowacki as of January 1, 2023
Exhibit 6 - Young Nowacki Sales Summary Detail.xlsx	List of parcels sold by Mr. Young & Mr. Nowacki

Review of Exhibit 1- 2023 Land Order Lake County

My review of the Land Order 2023 produces the same results as submitted by John Toumey (Please refer to Department Exhibit 1 - Land Order 2023 to 2023 Nghb % changes.xlsx).

The increases, decreases and no change data for the land rates has been derived from "Worksheet Exhibit 1- 2023 Land Order Lake County.xlsx". In this spreadsheet you will also find two tabs with additional analysis of Calumet Township. This was done after browsing through the list of Mr. Young's properties, majority of which are in Calumet.

On the highlighted first tab, I did an analysis of Calumet neighborhoods by breaking down the values further by Land Type and found that the maximum of %change is coming from Land Type 9 and minimum %change is coming from Land Type 91 (see table for Land Types).

Table 2-12. Land Type Options for Residential Acreage Tracts

This option	Indicates
9	The amount of land entered in the "Acreage" column is used as a residential homesite.
91	The amount of land entered in the "Acreage" column is classified as residential excess acres.

On the highlighted second tab, there is information specific to Mr. Young's properties sold in 2023. These properties are in neighborhood 2536 and 2554. Please refer to "Worksheet Young Nowacki Sales Summary Detail.xlsx". Also included on this tab are properties sold to Spasov 21 LLC in 2022 which are a part of Multi parcel sale. This analysis also reflects the proposed rate which has been applied to the current property record cards for each of the sold parcels owned by Mr. Young.

Review of Exhibit 3- 21_22 Sales by neighborhood

Part of my review was to verify that the sales price for the parcels in each Township was updated on the property record cards provided to us by the County officials. I did this by testing a few randomly picked parcels from each Township to match the values with the PRC's and ensured all the PRC 's were updated with the most current land values.

My next step was to review the 2022 sales and since majority of Mr. Young's sales are in Calumet Township and also due to time limitations, my study was specific to 2022 Calumet sales only. Please refer to "Worksheet Exhibit 3 -22 Sales for Calumet Nghd.xlsx"

Review of Exhibit 5 & 6: Properties Owned and Sold in 2022-2023 by Mr. Young

Please refer to "Worksheet Young Nowacki Sales Summary Detail.xlsx" It provides the listing of the properties sold by Mr. Young in 2023 from the two neighborhoods: 2554 and 2536.

Please refer to "Worksheet Exhibit 5 - All Properties Young - Nowacki 2023.xlsx" as well, which shows the sum of the study sale price and the sum of the total assessed value for each neighborhood where all the 1464 parcels owned by Mr. Young's are located. N/A in the columns simply means that none of the properties were sold in that neighborhood.

Review of the 2023 Ratio Study

The Ratio study is another tool to analyze the land values since land values reflect market value in use. And the market values, in essence are represented in ratio studies by sales prices which are confirmed, screened and adjusted as necessary.

So, my review started with the Pivot table which shows the percentage change of each parcel in the workbook. The Pivot table showed that 16% of the residential vacant parcels more than doubled in the Assessed Value from the prior year. Another 17% of the parcels increased between 30 %-100%

Assessed Value Pivot Table
45 Lake County
2022 Assessment Year

StudySection	More than 10% Decrease	0 to 10% Decrease	No Change	0 to 10% Increase	10 to 30% Increase	30 to 100% Increase	More Than Doubled	Total
Commercial Improved	448	3877	821	3746	479	306	172	9849
Commercial Vacant	74	11	2255	404	52	56	121	2973
Industrial Improved	55	494	63	526	133	62	42	1375
Industrial Vacant	14	1	516	84	20	60	56	751
Residential Improved	1104	8373	1219	111585	45471	5543	2349	175644
Residential Vacant	1612	529	11789	2015	2743	4802	4340	27830

StudySection	More than 10% Decrease	0 to 10% Decrease	No Change	0 to 10% Increase	10 to 30% Increase	30 to 100% Increase	More Than Doubled
Commercial Improved	5%	39%	8%	38%	5%	3%	2%
Commercial Vacant	2%	0%	76%	14%	2%	2%	4%
Industrial Improved	4%	36%	5%	38%	10%	5%	3%
Industrial Vacant	2%	0%	69%	11%	3%	8%	7%
Residential Improved	1%	5%	1%	64%	26%	3%	1%
Residential Vacant	6%	2%	42%	7%	10%	17%	16%

The county provided the following explanation in response to this increase:

Response:1360 of them were new parcels; about 300 were parcels in developer (discounted) rate last year and had land type changed when transferred to individual. The remainder were in Calumet township, which increased due to the land order.

The AV's for several of the Townships increased due to a number of factors but the majority of the Residential Vacant increase in Calumet was due to the land order changes as explained by the county.

Additionally, the Ratio comparison was reviewed (please refer to the Department Exhibit 2 - 45 Lake Ratio Comparison 04_17_2023.xlsx) and all the statistics were within the IAAO standards for each of the Townships.

This concludes that the 2023 assessments based upon the valid sales reflect the market value in use of the properties.

This also concludes my review of the 2023 Land order for Lake County. Please let me know if you need any additional document or need further clarification on any of the information provided.

Respectfully submitted,

Chirjeev (CJ) Oberoi
Assessment Field Representative

Since most of Mr. Young's properties are in Calumet, my sample test consisted of selection of 10 properties in Calumet, and the other 10 from the other townships in the countuy.

The above was a random sample test of a total of total sales listed on County Exhibit 3. I was able to reconcile the sales price on all sales to the sales price shown in the county website. The Assessed value information listed in Col I - K agreed with the ratio study workbook. I then reconciled these properties to the 2023 PRC. As shown above I found slight differences between the workbook value and PRC on 3 properties. Also, I was able to reconcile the land value base rate shown on the 2023 PRC to the 2023 land order report (Exhibit 1)
