As we have stated in previous comments in earlier years, the purpose and need ~~is~~ for this two-bridge project ~~is~~ remains indefensible. The downtown bridge is truly needed ^{and} the fix for Spaghetti Junction is truly needed, but there is no need for an eastern bridge at this time. This is even more true today than it was a few years ago - in good economic times ~~and~~ and lower gas prices. The demographics of the community are changing, with more people moving into town and considerable disinvestment in the suburbs. Hopefully the SEIS will be studying these issues as well.
