

Cross System Care Coordination

Location: Home Based

Client: Family

Duration: Moderate – six month referral with option for extension

Payer: DCS

Summary:

Cross-system care coordination is designed to facilitate child and family teams comprised of youth, families, their natural support persons, local systems, agencies, and community members. The services provided are comprehensive and will include cross-system coordination, case management, safety and crisis planning, comprehensive strength-based discovery and assessment, activities of daily living training, assistance to the FCM in the facilitation of the child and family team process, and family and child centered care. It is meant to provide a single comprehensive system of care that allows children and families in the child welfare and/or juvenile probation system(s) with complex needs to receive culturally competent, coordinated, and uninterrupted care.

The services provided to the clients and covered in the per child allotment rate will include all services necessary to meet the child's safety, permanency and wellbeing needs and addresses criminogenic risk factors. The rate is established by a 'Tier' based on the level of need, and once the tier is established, it remains in place for six months. Services include but are not limited to the following:
