Protecting our children,
families and future

Average Number Of Placements

Data in the report (both historical and current) may be subject to change as it is continually being validated and updated. This may result in statistical data in previous reports to be inconsistent with statistics found in more recent reports even when the data pertain to the same time period.

CHILD
SERVICES

Report Description

Average Number of Placements Per Child – The calculation is based on the total number of out of home placements for each CHINS child in out of home placement on the last day of the report month. This includes all placements during the current removal episode. This number is then divided by the total number of CHINS children who are in out of home placement on the last day of the report month to arrive at the average number of placements per child.

The out of home placements are placement type only. Parent and non-custodial parent placements are excluded from out of home placements.

In prior versions of this report a first placement ending in less than 8 days was removed from the calculation. We have removed this exclusion from the report and now those first placements ending in less than 8 days are included in this version of the report.

This report uses data collected at the end of the current report month. The graphs and numbers for historical months also use data from the historical month listed.

This data was pulled on the downloaded date for the current report month.
Business area owner of the report is DCS Field Operations Division.
