## YOUR PERSONAL TOUCH

I am a parent of a 27 year old with severe autism. A few months ago the person we depended on to watch our son was hospitalized and unable to watch him. This meant I was not able to work, which also meant no income from me.

A friend sent me a message telling me about home health care, and Your Healing Touch. I reached out and their wonderful staff trained me to become my son's home health aide. **This was a blessing that seemed too good to be true, but here I am getting paid to work with my son in our home.**
