NOTICE OF RULE MODIFICATION
FOR RULES CONCERNING THE OCCUPANCY OR CONSTRUCTION
OF SHELTERS, CARE FACILITIES, AND HOSPITALS DURING THE
PUBLIC HEALTH EMERGENCY

Due to the public health emergency created by the COVID-19 virus, Governor Holcomb granted agencies broad powers to waive, suspend, or modify existing rules where enforcement would be detrimental to the public welfare during the emergency, subject to his prior approval. See Executive Order 20-05.

In an effort to proactively respond to the anticipated need for additional structures to be used as shelters, care facilities, or hospitals during this time, the Fire Prevention and Building Safety Commission (the “Commission”), at its April 7th, 2020 meeting, modified the rules provided in the table below.

The following provisions apply to all modifications:

1. **Purpose.** In response to the increased need for particular structures due to the COVID-19 public health emergency, the purpose of these modifications are to ensure emergency shelters, care facilities, and hospitals are able to be made readily available without strict compliance with the rules of the Commission. To the greatest extent possible, without impacting public safety, structures shall be constructed or occupied in compliance with the rules of the Commission, regardless of whether a proposal permits noncompliance or an alternative method of compliance. If compliance is not able to be immediately obtained, all efforts shall be made to come into compliance as soon as possible without jeopardizing public safety.

2. **Scope.** These modifications only apply to shelters, care facilities, or hospitals set up to respond to the public health emergency created by the COVID-19 virus.

3. **Duration.** Unless explicitly provided otherwise, all modifications expire on the earlier of the following:
   (1) the termination of the current public health emergency; or (2) the repeal or amendment of the modification.

4. **Compliance Following Expiration of Modification.** Following the expiration of a modification, compliance with the rules of the Commission must be achieved by one of the following methods within 45 days:
   1. Obtaining a variance from the rules of the Commission;
   2. Performing any required construction and obtaining any required releases, or other approvals, required by a rule of the Commission; or
   3. Terminating the temporary occupancy of the structure for the unintended use, if the noncompliance was solely related to changing the use of a structure.
5. **Notification.** Prior to utilizing any modification, notification must be sent to buildingcommission@dhs.in.gov which shall include the following information:
   i. The address of each structure that will be utilizing the modification;
   ii. A brief explanation of the purpose of each structure, including whether the structure is intended to be used in the proposed capacity permanently or temporarily;
   iii. A brief explanation of the specific code requirements that cannot be immediately complied with; and
   iv. A proposed plan for coming into compliance with the rules of the Commission either during the emergency, if possible, or upon expiration of the proposal by one of the methods described in paragraph 4.

Please note, approval is not needed to take advantage of any modification, however, compliance with all rules of the Commission is required if you do not meet the conditions of these modifications.
