## Travel Advisory Map

As we move into the winter months, please regularly update your county's status on the [IDHS County Travel Status Map](#). **The map reports the date of the last change**, which can give the impression that counties are not updating the map in a timely manner, especially if the bar for a change is high within the county. **Regularly resetting the county status to "Normal" will help residents understand they have the most up-to-date information** when making any traveling decisions.
