Travel Advisory Map

As Indiana continues to receive winter storms, please regularly update your county's status on the [IDHS County Travel Status Map](#). **The map reports the date of the last change**, which can give the impression that counties are not updating the map in a timely manner, especially if the bar for a change is high within the county. Regularly resetting the county status to "Normal" will help residents understand they have the most up-to-date information when making any traveling decisions.
