

INDIANA DEPARTMENT OF HOMELAND SECURITY

EMA partners,

The Federal Emergency Management Agency (FEMA) communicated to IDHS today that Indiana counties will not be required to individually declare a county disaster to be eligible for EM 3456 Declaration assistance. This is an important development to help streamline the process for counties potentially eligible to request county assistance as they respond to COVID-19.

FEMA provided the attached procurement guidelines to inform counties on the processes and parameters of resource allocations. IDHS will work closely with FEMA and the Indiana State Department of Health to determine cost eligibility.

Thank you

IDHS
