**PRACTICAL SKILLS AND EXAMINATION HANDBOOK**

**Scenario 1 Directions**

This scenario is designed to be completed by a company of four. The company of four will be divided into two teams of two. One team will complete the skills assigned to team 1a and the other team will complete the skills assigned to team 1b. Once the scenario is completed the teams will switch assignments and complete the scenario again. This will ensure that all candidates participate in all skills assigned. It is up to the evaluators to ensure that candidates share in the work equally. Evaluators must be familiar with all associated skill sheets prior to the commencement of the skills examination. Apparatus used in this scenario must be placed in a position that will obscure the scenario activities from candidates at other skill stations. Candidate Companies must stay together at all times. It is the responsibility of the evaluators to ensure that candidates do not leave their skill station until they are directed to rotate to the next skill station.

Prior to commencement, evaluators will make team assignments, brief all candidates of the scenario and conduct a PPE inspection. Once this is complete the Lead Evaluator (or designee) will be notified that the crew is ready to begin. Candidates will mount the apparatus and proceed to the incident. Team 1b will dismount the apparatus at the hydrant or portable water tank and make all necessary connections. Team 1a will dismount apparatus make a 360 of the structure. Once this is accomplished they will make the necessary reports to an evaluator. Then one member will pull the attack line while the other gathers necessary equipment from the apparatus, gain entry into the structure call for water and ready the attack line. After team 1b has established a water supply they will gather all necessary equipment and set up for RIT. After the RIT area is set up they will don an SCBA and stand by. Once RIT is established, Team 1a will enter the structure, locate and extinguish the fire. Once the fire is extinguished they will perform hydraulic ventilation and check for hidden fires.

Depending on the number of candidates, there will be a set up company who will be responsible for repacking the attack and supply lines and assisting the evaluators prepare for the next scenario. This can easily be accomplished with larger classes (16 or larger), however this assignment may not be staffed for smaller classes (12-15). If this company is not staffed the company in rehab can assist or the company assigned to the scenario must accomplish the tasks. There will be a skill sheet for the tasks identified with this company and must be signed off when they are completed.
