**Scenario 7 Directions**

This scenario is designed to be completed by a company of four. The company of four will be divided into two teams of two. One team will complete the skills assigned to team 7a and the other team will complete the skills assigned to team 7b. Once the scenario is completed the teams will switch assignments and complete the scenario again. This will ensure that all candidates participate in all skills assigned. It is up to the evaluators to ensure that candidates share in the work equally. Evaluators must be familiar with all associated skill sheets prior to the commencement of the skills examination. Apparatus used in this scenario must be placed in a position that will obscure the scenario activities from candidates at other skill stations. Candidate Companies must stay together at all times. It is the responsibility of the evaluators to ensure that candidates do not leave their skill station until they are directed to rotate to the next skill station.

Prior to commencement, evaluators will make team assignments, brief all candidates of the scenario and conduct a PPE inspection. Once this is complete the Lead Evaluator (or designee) will be notified that the crew is ready to begin. Candidates will mount the apparatus and proceed to the incident. Team 7a will dismount the apparatus, assume command, complete a scene size up (each member must give a verbal size up to the evaluator individually) once they are directed they will begin fire attack operations. Team 7b will dismount the apparatus, place traffic control devices, set up scene lighting, place a foam line in-service and cover the spill. Once each team has completed all skills prescribed they will get the apparatus to a ready state.
