I am submitting for approval of a testing site in Daviess county at our Health Pavilion site ([1805 S State Road 57, Washington, IN 47501](#)). The basic plan for the structure is attached with construction and installation being performed by DANCO Construction, INC from Evansville, IN.

This is a lean-to style structure that will have 2 roller style garage doors to allow vehicle entry and exit and shield staff members performing testing to not be in the elements. There is an exhaust fan built into the north wall to allow for the removal of any possible vehicle exhaust if the doors are in the down position for an extended period of time. The structure is not heated or cooled and the only point the structure is affixed to the building is approx. 17 feet up the wall to allow for rigidity, this doesn't interfere with the structure of the health pavilion or any internal walls. To address the memo "Notice of Rule modification for rules concerning the occupancy or construction or shelters, care facilities, and hospitals during the public health emergency" paragraph 5 i-iv. The below response are submitted:

5 i - [1805 S State Road 57, Washington, IN 47501](#)

5 ii – Temporary lean-to style structure for the performance of COVID testing. This is being funded by a state grant to the Daviess County Health Department.

5 iii – per 675 IAC 12-4-12; this structure is to provide a testing site in the county and does not modify or degrade the existing structure that is already in place. The only point of connection with the current structure is at the hi-point of the roof on the exterior surface.

5 iv – upon the termination of the public health emergency, DCH will terminate the use of the test site as directed or obtain the required permits/approvals as required.

If you have further question/concerns please contact me at the email or phone numbers listed below.

Thanks

Joe Gardner
