

CISA recently released [CISA Insights: Preparing For and Mitigating Potential Cyber Threats \(TLP:White\)](#) to provide critical infrastructure leaders with steps to proactively strengthen their organization's operational resiliency against sophisticated threat actors, including nation-states and their proxies.

Together with our partners at CISA, the State of Indiana urges organizations to maintain a heightened sense of awareness and vigilance in preserving and protecting their critical systems/infrastructure.

**To report a cyberattack or a cyber-related incident, please be sure to call our State of Indiana Emergency Operations Center (EOC) watch desk at (317) 238-1751. For additional information on reporting an incident, visit the Indiana Cyber Hub website at: [www.in.gov/cybersecurity/report-a-cyber-crime/](http://www.in.gov/cybersecurity/report-a-cyber-crime/).**

Executives and senior leaders can proactively take steps to prepare their organizations should an incident occur. Implementing cybersecurity best practices can help guide leaders to strengthen operational resiliency by improving network defenses and rapid response capabilities.

If you have any additional questions or concerns, please notify the appropriate agency.

Respectfully,

Tracy Barnes - Chief Information Officer, Indiana Office of Technology  
Stephen Cox - Executive Director, Indiana Department of Homeland Security  
Captain Bryan Harper - Commander, Office of Intelligence and Investigative Technology and Director, Indiana Intelligence Fusion Center, Indiana State Police  
Chetrice Mosley-Romero, State of Indiana Cybersecurity Program Director
