PROPOSED CODE CHANGE (Check One)

☐ Change to read as follows   ☒ Add to read as follows   ☐ Delete and substitute as follows   ☐ Delete without substitution

Add the following definition:

HIGH VOLUME LARGE DIAMETER FAN: A low speed ceiling fan that circulates large volumes of air and that is greater than 7 feet (2134 mm) in diameter.

Add the following new Section 929 to read as follows:

Section 929 – HIGH VOLUME LARGE DIAMETER FANS
929.1 General. Where provided, high volume large diameter fans shall be tested and labeled in accordance with AMCA 230, *listed* and *labeled* in accordance with UL 507, and installed in accordance with the manufacturer's instructions.

Add the following referenced standards to Chapter 15: Under AMCA, add 230-CD1. Under UL, add 507.

REASON STATEMENT AND FISCAL IMPACT

The code language has been accepted for inclusion in the 2018 IMC (Proposal M108-15), and recognizes new technology and national standards. The proposed language adds the appropriate test standard, installation instructions, and a definition for high volume large diameter fans.

Fiscal impact: None. Recognizes new technology and updates reference standards. Fans are not being made mandatory, and multiple manufacturers currently manufacture products in compliance with the new reference standards. Eliminates the necessity for variances to use the most recent technology.
