**To:** Governor Eric J. Holcomb

**From:** Daniel Shackle, Commissioner  
Department of Local Government Finance

**Copy:** Members of the Indiana General Assembly

**Date:** April 30, 2024

**Subject:** Report on Expenditures Per Capita

The attached Report on Expenditures Per Capita (“Report”) is filed in accordance with Ind. Code § 6-1.1-33.5-7. The Report, prepared by the Data Analysis Division of the Indiana Department of Local Government Finance (“Department”), presents a compilation of each political subdivision’s expenditures per capita based on 2022 and 2023 data provided by each local government’s annual financial report. Data were compiled according to the type of local government: counties, townships, cities/towns, school corporations, libraries, special districts, conservancy districts, and soil and water conservation districts.

Indiana Code calls for a report that includes each local government’s total amount of expenditures per capita based on the most recent federal decennial census for which comprehensive data has been reported. The Indiana State Board of Accounts provided expenditure information for all non-school local governments, while the Indiana Department of Education provided expenditure information for schools. The Department has determined the highest, lowest, median, and average expenditures per capita for each local government.

Please feel free to contact me with any questions you may have.

## Overview of the Report on Expenditures Per Capita

This Expenditures Per Capita Report (“Report”) provides an annual compilation of the total expenditures per capita of each local government unit defined as a political subdivision under Ind. Code § 6-1.1-1-12 and Ind. Code § 36-1-2-13. Expenditure information reported here reflects the calendar year expenditures for each local government, as reported by the unit. The expenditures are the actual disbursements made by the political subdivision, which may be different from both the tax revenue received and the total budget appropriations authorized. A political subdivision’s per capita expenditure is the sum of all its expenditures for a given year net of transfers, interfund loans, agency fund disbursements, and purchases of investments, as identifiable in the Annual Financial Report, divided by the local government’s population.

Each non-school local government is required to file an Annual Financial Report with the Indiana State Board of Accounts (“SBOA”). Except for data on school expenditures, all expenditure data are drawn from the 2022 and 2023 Annual Financial Reports filed by each political subdivision with the SBOA. The Indiana Department of Education (“DOE”) provided all school corporation expenditure information. The school corporation expenditure information does not reflect data from any school corporations that did not submit their report in 2022 or 2023.

Annual Financial Reports for 2023 are required by law to be submitted not later than March 1, 2024, for all units other than school districts. As of March 28, 2024, not all local governments had filed their 2023 Annual Financial Reports. The notation “Data Not Provided” in the 2023 expenditure per capita column indicates that the local government has not yet reported its data for 2023. The percentage of local governments that reported expenditure data for 2023 as of March 28, 2024 is as follows:

- Counties (97.8%)
- Townships (97.4%)
- Cities/Towns (94.0%)
- School data submitted to DOE (99.7%)
- Libraries (99.6%)
- Special Districts (Solid Waste) (86.1%)
- Special Districts (Other than Solid Waste) (83.2%)
- Conservancy Districts (90.1%)
- Soil and Water Conservation Districts (100%)

As a comparison, the 2022 per capita expenditure data reflected in the 2023 published report is supplied in this Report.

## Reading the Report

The expenditure data in the Report is organized by political subdivision type. With the exception of counties, all political subdivisions are further categorized according to the county in which the unit provides services. Some political subdivisions may provide services in more than one county, and these units are listed once under the county that is considered as the “major county” for that particular unit. Per the definition established by SBOA for annual financial reporting, a “major county” is the county where the unit’s main office is located.

For most political subdivisions, expenditure data points are reported on a per capita basis. If available, the population of the service area—not just the population of the major county—was used to calculate the per capita expenditure amount. As census data are not available for some of the special districts, the political subdivision’s total expenditure is reported instead. For 2023 expenditure levels, each unit is ranked from highest to lowest and the unit’s rank is listed next to the per capita data.

Several descriptive statistics are presented for each political subdivision type:

- The “Average” is the total expenditure per capita for each political subdivision type divided by the number of political subdivisions.
- The “Median” is the middle expenditure per capita for each political subdivision type after the numbers have been numerically ordered.
- The “Lowest” is the smallest political subdivision expenditure per capita for each political subdivision type.
- The “Highest” is the greatest political subdivision expenditure per capita for each political subdivision type.
- The “Units Reporting” is the total number of political subdivisions with Annual Financial Report submissions to the State Board of Accounts.

For political subdivision types where population data points are not available, these statistics are displayed; however, the statistics are based on total expenditures for each political subdivision rather than expenditures per capita.

## Report Methodology

Expenditure data for 2023, for all political subdivisions (except school corporations), were drawn from a database within the Gateway for Local Governments. This database includes fund-level disbursements for each political subdivision, as well as detailed classifications of expenditures by type. These expenditures have not been audited. Updates made after March 28, 2024, are not included in the Report. Live updates of the data are available under the “Annual Financial Report” option at: [https://gateway.ifionline.org/report\\_builder](https://gateway.ifionline.org/report_builder).

The Department subtracts certain disbursements to estimate a net expenditure. To calculate net expenditures, certain disbursement types were removed, as they are not expenditures.

The Department worked with the SBOA to achieve an accurate calculation of net expenditures. For the calculations, distributions for the following distribution codes were subtracted:

D701	Payments To or On Behalf of Beneficiaries
D702	Payment of Taxes and Other Payroll Withholdings
D703	Distributions to Other Governmental Entities
D704	Transfer Out – Transferred to Another Fund
D705	Interfund Loan – Loaned to Another Fund
D706	Interfund Loan – Repaid to Another Fund
D900	Purchase of Investments

Expenditure and Average Daily Membership (“ADM”) data for schools were provided by the DOE in a spreadsheet listing each school corporation’s total expenditures, net of interfund loans, transfers, and purchases of investments, for calendar years 2022 and 2023. School corporation expenditure data is current as of April 19, 2024. Data has been excluded for school corporations that did not submit 2023 figures.

All census data – *except for data pertaining to library districts* – were drawn from the 2020 United States Census with the assistance of the Indiana Business Research Center (“IBRC”). The IBRC is currently working with the Indiana State Library on compiling 2020 United States Census counts broken down by the individual library districts in Indiana; however, at the time this report was published, not all of the 2020 data was available.

The notation “No 2020 Census Data” in the “2022 Expenditures Per Capita” and “2023 Expenditures Per Capita” column indicates that the 2020 Census Data for that particular local unit was not provided in the source material sent to the Department.

## Counties

County government in Indiana is responsible for performing many duties, including law enforcement (which includes sheriff and jail services), elections, civil and criminal courts, and health services. Officials in county government also administer the property tax system. Services provided by counties generally do not differ across the state; therefore, disparities in spending levels may be caused by differing levels of current capital investments and differing levels of efficiency.

Indiana has 92 counties. Based on the 2020 Census, the counties range in population from 5,940 (Ohio County) to 977,203 (Marion County).

The table immediately below shows the 2022 and 2023 summary statistics for the counties. The comprehensive list of reporting county units and their respective values can be found on the following pages. For further detail on any unit shown below, please refer to the annual financial report submitted by that unit for the applicable year (i.e., 2022 or 2023).

<b>Expenditures Per Capita: Counties</b>

WHITLEY COUNTY	\$ 2,912.42	28	\$ 3,377.95	20

## Townships

Township government in Indiana provides monetary and in-kind assistance to citizens in need (“township assistance”), as well as fire protection services and the performance of other duties for areas without other forms of municipal government.

There are currently 1,002 townships in Indiana, with populations ranging from 52 to 156,686. This wide variation in population, along with other demographic factors, results in townships offering varying combinations and levels of services. For example, smaller rural townships often rely on volunteer fire departments, while more urban townships may provide a full-time fire department or contract with a municipal fire department. Township assistance will vary in regard to economic conditions and differing local standards for qualification.

The advent of fire protection districts and territories has allowed many townships, cities, and towns to work together to provide this service. The complexity of funding these districts makes it difficult to compare township expenditures purely on a per capita basis. A township may have lower expenditures than average because its expenditures on fire protection are reported by the consolidated fire protection district or territory. Conversely, a township that purchases a capital asset such as a fire truck may have higher expenditures than average, even though the fire truck is used to provide service throughout the fire protection territory. Townships may also contribute to funding services such as Emergency Medical Services (EMS) and parks that are utilized by taxpayers both inside and outside township boundaries.

The table immediately below shows the 2022 and 2023 summary statistics for the townships. The comprehensive list of reporting township units and their respective values can be found on the following pages. For 2022 and 2023, five (5) townships did not provide data. Further details on any unit shown below can be found in the annual financial report submitted by that unit for the applicable year (i.e., 2022 or 2023).

Township expenditures are grouped by county. Because townships cannot cross county boundaries, each township is listed once.

<b>Expenditures Per Capita: Townships</b>

## Cities and Towns

Cities and towns in Indiana provide police, fire protection, and developmental planning. There are currently 567 cities and towns in Indiana, excluding Indianapolis, which is considered to be a special district due to its consolidated structure. Population counts for Indiana cities and towns range from 12 (New Amsterdam Civil Town) to 263,886 (Fort Wayne Civil City).

Many factors, including efficiency of operations, may impact expenditure levels for cities and towns. Firstly, numerous cities and towns receive large amounts of revenue from specialized sources that may allow for greater expenditures. Secondly, as with townships, cities and towns may be in fire protection districts or territories, further increasing the complexity of comparing expenditures to level of service.

In addition, some cities and towns provide enterprise services, such as electrical, water, sewer, and solid waste removal. Cities and towns that provide these services may have greater per capita expenditures than cities and towns that do not. To facilitate review, expenditures for cities and towns are broken out by total non-enterprise net expenditures and total net expenditures, which is the sum of non-enterprise and enterprise expenditures.

The table immediately below shows the 2022 and 2023 summary statistics for total expenditures for the cities and towns. The comprehensive list of reporting municipal units and their respective values can be found on the following pages. For 2022 and 2023, eight (8) cities and towns did not provide data. Further details on any unit shown below can be found in the annual financial report submitted by that unit for the applicable year (i.e., 2022 or 2023).

City and town expenditures are grouped by county. Each city or town is listed only once. Cities or towns that serve populations in more than one county are listed under the “major county” for that particular city or town. Cities and towns identified with the highest and lowest expenditures in the following table are based on total expenditures per capita.

<b>Expenditures Per Capita: Cities &amp; Towns</b>

## Schools

School corporations in Indiana provide primary and secondary education to students. There are 291 school corporations in Indiana that report to the Department, with populations ranging from 1,325 (Medora Community School Corporation) to 319,011 (Indianapolis Public School Corporation). Many school corporations provide transportation to and from school facilities and finance school buildings in addition to the core responsibility of education.

In addition to variations in efficiency, differences in school corporation expenditures are likely related to differences in spending on capital projects (such as buildings), transportation, and school programs (such as special needs education). The variation in capital project spending is now more influenced by voter preference than in previous years because of the availability of referenda for large capital projects and operating purposes. The cost of transporting students varies based on the geographic area of the school corporation.

The table immediately below shows the 2022 and 2023 summary statistics for the school corporations. The comprehensive list of reporting school corporation units and their respective values can be found on the following pages. For 2022 and 2023, one (1) school corporation did not provide data. For further detail on any unit shown below, please refer to the Indiana Department of Education (DOE) for the expenditure and ADM information provided to DOE.

## Libraries

Pursuant to Ind. Code § 36-12-1-8(b), “public libraries provide free library services in order to meet the educational, informational, and recreational interests and needs of the public.” Accordingly, libraries in Indiana provide books, magazines, newspapers, and other reference material to library patrons on a short-term basis. In addition, almost all libraries provide public computers and Internet access.

There are currently 239 public libraries in Indiana, serving populations ranging from 155 (York Township Public Library, Benton County) to 963,251 (Indianapolis-Marion County Public Library). Public libraries may be created by various types of political subdivisions (e.g., cities or counties) and have boards appointed by the unit that created them.

The table immediately below shows the 2022 and 2023 summary statistics for the libraries. The comprehensive list of reporting library units and their respective values can be found on the following pages. For 2022 and 2023, eight (8) libraries did not provide data. Further details on any unit shown below can be found in the annual financial report submitted by that unit for the applicable year (i.e., 2022 or 2023).

Public library expenditures are grouped by county. Each library is listed only once. Libraries that serve populations in more than one county are listed under the “major county” for that particular library system.

## Special Districts

Governmental services that are not provided by counties, townships, cities and towns, schools, or libraries are often provided by political subdivisions referred to as special districts. The main types of special districts in Indiana are:

- Solid Waste Management Districts
- Airport Authorities
- Fire Protection Districts
- Transportation Corporations
- Sewer Districts

Every county is either part of a multi-county solid waste management district, or has its own solid waste management district. Therefore, determining the per capita expenditure for these districts is straightforward, and expenditure levels are presented on a per capita basis.

Determining the population served for the other types of special districts is not possible given existing data. The total gross expenditure for these districts is provided instead.

For special districts, the caveats regarding differences among expenditure levels are even more significant. Because the expenditures are not normalized on a per capita basis, greater variation can be expected. Comparisons of expenditure levels among different types of non-solid waste special districts are likely not meaningful to most users. Even comparisons among similar types are difficult due to the unique legal and financial conditions under which each district operates.

The tables immediately below show the 2022 and 2023 summary statistics for the special districts. Solid waste management districts have been broken out from other types of special service districts. The comprehensive list of reporting special district units and their respective values can be found on the following pages. For 2022 and 2023, seven (7) solid waste management districts did not provide data, and thirty-four (34) other special service districts did not provide data. Further details on any unit shown below can be found in the annual financial report submitted by that unit for the applicable year (i.e., 2022 or 2023).

Special district expenditures are grouped by county. Each special district is listed only once. Special districts that serve populations in more than one county are listed under the “major county” for that particular district.

## Conservancy Districts

Conservancy districts in Indiana are established for many purposes, including flood prevention and control, drainage improvement, irrigation management, and wildlife and forest development. These districts are unique because they are established through the local court and are not handled the same way as other political subdivisions. Conservancy districts are not subject to maximum levy limitations, and the tax rate applied to a conservancy district is calculated separately from the tax district rate.

Conservancy districts have well-established boundaries; however, the United States Census Bureau does not track population within these boundaries. For this reason, the data provided here includes total gross expenditures rather than expenditures per capita.

The table immediately below shows the 2022 and 2023 summary statistics for the conservancy districts. The comprehensive list of reporting conservancy district units and their respective values can be found on the following pages. For 2022 and 2023, seven (7) conservancy districts did not provide data. Further details on any unit shown below can be found in the annual financial report submitted by that unit for the applicable year (i.e., 2022 or 2023).

Conservancy district expenditures are grouped by county. Each conservancy district is listed only once. Conservancy districts that serve populations in more than one county are listed under the “major county” for that particular district.

<b>Total Expenditures: Conservancy Districts</b>

**Soil & Water Conservation Districts**

Soil and water conservation districts are established under Ind. Code § 14-32-5 and exist to prevent soil erosion and water runoff. Districts may carry out this purpose through a number of measures, including engineering operations, methods of cultivation, the growing of vegetation, and changes in use of land.

Each district is governed by a board of five (5) supervisors that serve in staggered three-year terms. Three (3) supervisors are elected at an annual meeting of landowners and two are appointed by the State Soil Conservation Board.

The table immediately below shows the 2022 and 2023 summary statistics for the soil and water conservation districts. The comprehensive list of reporting soil and water conservation units and their respective values can be found on the following pages. For further detail on any unit shown below, please refer to the annual financial report submitted by that unit for the applicable year (i.e., 2022 or 2023).

Soil and water conservation district expenditures are grouped by county. Each district is listed only once.

<b>Total Expenditures: Soil &amp; Water Conservation Districts</b>				
	<u>2022</u>		<u>2023</u>
