Sales Window	1/1/2024	to	12/31/2024
If more than one year of sales were used, was a time adjustment applied?			
<input checked="" type="checkbox"/> No	Explain, why not: Given the nature of the current real estate market, it was not appropriate to expand the sales window to include sales that were part of the great expansion of the real estate market of the past few years.		
<input type="checkbox"/> Yes	Explain the method used to calculate the adjustment:		

Groupings
Please provide a list of townships and/or major class groupings (if any). Additionally, please provide information detailing how the townships and/or major classes are similar in the market.

****Please note that groupings made for the sole purpose of combining due to a lack of sales with no similarities will not be accepted by the Department****

German and Armstrong sales were grouped together for the Residential Improved because these adjacent Townships are situated in the Northeast corner of the County, do not contain any major Towns and have similarly rural property types.

Commercial and Industrial classes were grouped together in order to determine the most effective review of assessed values amongst the major class types. While distinct differences exist between property classes, the overall assessment level of the combined grouping demonstrates equity between all of the major classes in light of recent cost table updates and other changes.

Cyclical Reassessment

Please explain which townships were reviewed as part of the current phase of the cyclical reassessment. Also, list any townships where the number of parcels reviewed were more than the formally approved reassessment plan. Note: All parcels reviewed should meet the 25% requirement with the 2% tolerance threshold (23-27%)

Comments
<p>In this space, please provide any additional information you would like to provide the Department in order to help facilitate the approval of the ratio study. Such items could be standard operating procedures for certain assessment practices (e.g. effective age changes), a timeline of changes made by the assessor's office, or any other information deemed pertinent.</p>

Per the DLGF, Cost table, depreciation, location cost multipliers (if applicable) were implemented. A preliminary ratio study was then conducted for all properties where sufficient sales data were available. This study dictated which property classes required further analysis, stratification, reassessment, or calculation of a new neighborhood factor.
