Barry Wood
Director Assessment Division
Department of Local Government Finance
Indiana Government Center North
100 North Senate Ave N1058 (B)
Indianapolis, IN 46204

Dear Barry,

We have completed the 2016 ratio study for Johnson County's annual adjustment. We used every sale between January 1, 2015 and December 31, 2015 that was deemed valid, including multi parcel sales and sales that were vacant at the time of sale but are now improved. The sales reconciliation tab will explain the sales that were not used in our study.

Residential and Agricultural Homesites

All townships vacant parcels were grouped together to create a better market area. This method was used in order to establish land rates using an adequate number of sales for an area rather than just 1 or 2 sales per township. New house types have been created for residential parcels and factors applied when necessary to bring the neighborhoods within IAAO standards. Foreclosed sales have been reviewed by neighborhood to determine what effect if any they have on the market in each area.

Commercial and Industrial

The majority of Commercial and Industrial parcels are in the Greenwood and Franklin area. All townships were grouped together to create a greater market area, and adjustments made accordingly. New neighborhoods have been created for commercial and industrial parcels and factors applied when necessary to bring the neighborhoods within IAAO standards.

Summary

Several pricing methods have been changed and influence factors removed to create more uniform land values within the neighborhoods. This did cause the land to increase and/or decrease at different levels, however same size lots are now valued the same. Creation of sub market and market areas have been created to group similar smaller areas together for analyzing data. We saw an increase in home building and lot development in the Residential market. These changes caused an increase in value in the White River area. There was also an increase in the Commercial market. The new construction and lot development caused a large increase of value in Industrial and Commercial improved and in vacant lots in Franklin, Needham, Pleasant, and White River Townships. Because of the lack of sales, Commercial and Industrial vacant properties have been grouped together to analyze the market trends.

If you have any questions feel free to contact me.

Sincerely,

Mark Alexander
Johnson County Assessor
