

Narrative

General Information

County Name: Porter

Person Performing Ratio Study: Dudley Scheumann

Sales Window: 01/01/2020 to 12/31/2020

One year of sales was sufficient for the residential vacant, residential improved and commercial improved property types. Adding more years of sales to the commercial vacant, industrial vacant and industrial improved would not produce enough sales to trend those property types.

Groupings

Improved Residential

The residential improved sales were of sufficient quantity to evaluate each Township individually.

Vacant Residential

Center and Portage Townships were trended individually. The remaining Townships were combined into two groups based on geography. The one group includes Boone, Jackson, Morgan, Pine, Pleasant and Porter Townships. The remaining group includes Liberty, Union, Washington and Westchester Townships. The limited amount of sales in this group can be attributed to the following reasons. Most vacant residential properties are being sold to builders at a reduced price or are traded between developers. We also are seeing a new trend of selling just the completed house and not selling the land separately. This seems to be happening increasingly more in Porter County. A majority of properties that are not sold to a builder/developer were previously agricultural and therefore cannot be used in the study.

Improved Commercial & Industrial

Portage Township was trended individually. Center and Washington Townships were combined based on geography. Boone, Liberty, Pine, Pleasant, Union and Westchester were grouped together based on geography as well. There were not enough commercial improved sales in the remaining Townships to get an accurate trending factor.

There were not enough Industrial sales in the County to trend according to IAAO Standards.

Vacant Commercial & Industrial

There were not enough commercial or industrial vacant sales to properly calculate a trending factor.

Comments

In most areas in Porter County sales are rising. The residential market is still very strong. The inventory of houses for sale is very low. There is also a lot of new construction and most of the new construction is sold before being built. We are seeing things sell in less than a week and for more than the listing price in some areas. Each sale in this study has been scrutinized for validity, sometimes more than once, using information derived from sales disclosures, field visits, MLS, and verification letters.
