

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5 Check
DATE PREPARED:
COUNTY: ADAMS COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceding years	Year	Annual Adams Nonfarm Personal Income	Percent From	Change To	Calculation	
	0	2009	910,464.0	2008		
	1	2010	937,757.0	2009	2010	
Step 1b: Calculate the annual percent change for each of the six preceding years	2	2011	1,009,428.0	2010	2011	0.030
	3	2012	1,079,793.0	2011	2012	0.070
	4	2013	1,081,516.0	2012	2013	0.002
	5	2014	1,132,201.0	2013	2014	0.047
	6	2015	1,188,690.0	2014	2015	0.050
Step 2: Sum the results of Step 1b						0.275
Step 3: Divide the results of Step 2 by six						0.046
SIX YEAR AVERAGE GROWTH						0.046 or 4.600%

Table CA4

Employment (number of jobs)							
Total employment	17,987	18,616	18,847	19,080	19,368	20,027	20,448
Wage and salary employment	12,525	13,158	13,243	13,491	13,656	14,161	14,452
Proprietors employment	5,462	5,458	5,604	5,589	5,712	5,866	5,996

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. E contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organization
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).
 Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Proprietors employment	1,377	1,330	1,310	1,287	1,320	1,368	1,399

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
 Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
 Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
 Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
 Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Supplements to wages and salaries	177,117	189,786	193,623	213,834	224,359	246,083	248,473
Employer contributions for employee pension and insurance funds 8/	124,714	132,277	133,303	147,454	152,404	169,193	168,183
Employer contributions for government social insurance	52,403	57,509	60,320	66,380	71,955	76,890	80,290
Proprietors' income 9/	71,871	80,500	101,507	94,151	183,565	134,408	115,751
Farm proprietors' income	18,322	25,676	41,197	22,122	104,695	56,872	31,582
Nonfarm proprietors' income	53,549	54,824	60,310	72,029	78,870	77,536	84,169
Employment (number of jobs)							
Total employment	19,373	20,511	21,350	22,236	23,421	23,892	24,528
Wage and salary employment	16,301	17,457	18,266	19,117	20,221	20,697	21,255
Proprietors employment	3,072	3,054	3,084	3,119	3,200	3,195	3,273

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

Proprietors employment	8,802	8,568	8,814	8,501	8,761	8,901	9,154

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Proprietors employment	3,764	3,608	3,640	3,531	3,498	3,482	3,577

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
 Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
L.C. 6-1.1-17-3.5
DATE PREPARED:
COUNTY: JOHNSON COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceding years	Year	2009	2010	Annual	Percent	Change	Calculation
				Johnson Nonfarm Personal Income			
	0	2009		4,982,656.0	2008	2009

Employment (number of jobs)							
Total employment	16,764	17,508	18,359	19,444	20,507	20,907	21,413
Wage and salary employment	10,764	11,327	11,829	12,815	13,539	13,921	14,235
Proprietors employment	6,000	6,181	6,530	6,629	6,968	6,986	7,178

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Proprietors employment	4,969	4,775	4,875	4,797	4,776	4,872	5,001

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
L.C. 6-1.1-17-3.5
DATE PREPARED:
COUNTY: MADISON COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceding years	Year	2009	2010	2011	2012	2013	2014	2015	Annual	Percent	Change	Calculation
									Madison Nonfarm Personal Income			
	0	2009							3,755,841.0	2008		
	1	2010							3,790,219.0	2009	2010	0.009

Wage and salary employment	15,586	15,473	15,469	15,722	15,743	16,036	16,652
Proprietors employment	4,102	4,093	4,093	4,126	4,228	4,241	4,350

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
L.C. 6-1.1-17-3.5
DATE PREPARED:
COUNTY: MORGAN COUNTY

Proprietors employment	4,620	4,568	4,626	4,586	4,687	4,716	4,833

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
 Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

Proprietors employment	2,347	2,435	2,363	2,458	2,531	2,522	2,581

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
 Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Proprietors employment	2,931	2,880	3,038	2,867	2,887	2,853	2,923

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Proprietors employment	2,229	2,109	2,186	2,202	2,125	2,076	2,129

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
 Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

Nonfarm proprietors' income	30,468	28,480	31,871	38,843	37,459	36,583	36,366
Employment (number of jobs)							
Total employment	6,758	6,768	6,813	6,602	6,768	6,739	7,016
Wage and salary employment	4,522	4,635	4,622	4,587	4,736	4,728	4,954
Proprietors employment	2,236	2,133	2,191	2,015	2,032	2,011	2,062

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5

Proprietors employment	940	886	984	972	974	984	1,001

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
L.C. 6-1.1-17-3.5
DATE PREPARED:
COUNTY: WARRICK COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceding years	Year	2009	2010	2011	2012	2013	2014	2015	Annual	Percent	Change	Calculation
									Warrick			
				Personal Income	From	To			Nonfarm			
	0			2,311,199.0	2008	2009						
Step 1b: Calculate the annual percent change for each of the six preceding years	1			2,416,539.0	2009	2010	0.046					
	2			2,580,921.0	2010	2011	0.068					
	3			2,718,726.0	2011	2012	0.053					
	4			2,710,027.0	2012	2013	-0.003					
	5			2,878,324.0	2013	2014	0.062					
	6			3,006,267.0	2014	2015	0.044					
Step 2: Sum the results of Step 1b				0.270								
Step 3: Divide the results of Step 2 by six				0.045								
SIX YEAR AVERAGE GROWTH				0.045	or

Proprietors employment	3,273	3,154	3,145	3,053	3,151	3,095	3,170

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2015 reflect county population estimates available as of March 2016.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
 Last updated: November 17, 2016-- new estimates for 2015; revised estimates for 1998-2014.
