

DNR 30-DAY PUBLIC NOTICE

The Department of Natural Resources serves the DNR 30-Day Public Notice in order to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3.

The DNR 30-Day Public Notice is published weekly to serve notice of the latest permit applications received at the DNR, Division of Water. This Notice can be viewed on the web at <http://www.in.gov/dnr/water/> and can be provided by email upon written request. To receive the DNR 30-Day Public Notice as a weekly email attachment, email your full name and a valid email address to DNRPublicNoticeRecipient@dnr.IN.gov.

The permit applications and supporting documentation is available for public viewing on-line at <https://downunity.dnr.in.gov/#>. For questions concerning a permit application, contact the Division of Water, Technical Services Section, at (317) 232-4160 or toll free at 1-877-928-3755 and select 1 during the recorded menu narrative.

Petition for Public Hearing

A pre-action public hearing on an application may be requested by filing a written petition. For a petition to be considered valid it must:

1. contain the typed or legibly printed name and complete mailing address of each petitioner;
2. be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. affirm that each signatory to the petition satisfies the requirements of item 2; and
4. identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted. To request a pre-action public hearing, send the petition by email to water_inquiry@dnr.in.gov or by mail to:

IDNR, Division of Water
Technical Services Section
402 West Washington Street, Room W264
Indianapolis, Indiana 46204-2641

Notification of Department Action

A person may request that the Department notify them when a Department Action is issued. To be notified of a Department Action, send a request that includes the permit application number or the applicant name, project description and county to email address water_inquiry@dnr.in.gov or by mail to the address above.

Permit Application Numbers with a prefix of:

FW are being reviewed under the Flood Control Act, IC 14-28-1 and the Flood Plain Management Rule, 312 IAC 10

PL are being reviewed under the Lake Preservation Act, IC 14-26-2 and the Public Freshwater Lake Rule, 312 IAC 11

DR are being reviewed under the Lowering of the Ten Acre Lake Act, IC 14-26-5

NW are being reviewed under the Navigable Waterways Act, IC 14-29-1

LM are being reviewed under the Navigable Waterways Act, IC 14-29-1 related to Lake Michigan

SG are being reviewed under the Sand and Gravel Permits Act, IC 14-29-3

AC are being reviewed under the Construction of Channels Act, IC14-29-4

DNR 30-DAY PUBLIC NOTICE

Date: 1/6/2021

Application #: FW-30772-0

Waterbody: Shoemaker Ditch

Applicant: Mark Nielson, 12732 Fuller Court, , , Fishers, IN, 46038

Received Date: 10/26/2020

County: Hamilton

Project Description: Approximately 50' of eroded streambank was previously stabilized using approximately 205 tons of rip rap. Rip rap was keyed into the streambed at the base and conforms to the existing bank.

Project Location: Approximately 1100' north and 850' west of the intersection of East 126th Street and Lantern Road at Fishers

Application #: FW-30795-0

Waterbody: Unnamed Tributary Gold Creek

Applicant: Tom Spees, 649 East Country Lane, Martinsville, IN, 46151

Received Date: 11/9/2020

County: Morgan

Project Description: Improvements will be done on the existing YMO Lake Dam (DNR Dam ID 55-14). The existing 48" CMP drop pipe will be sliplined with 36" HDPE and the existing 36" CMP discharge pipe will be sliplined with 30" HDPE. The existing 15' emergency spillway will be enlarged to 46'. Soil from widening of the emergency spillway will be used to raise the crest of the dam from the current elevation of 784.2 to 785.0. All disturbed areas will be seeded with a permanent seed mix protected with either mulch or erosion blankets depending on the slope being seeded. A 29 square yard mat, 12" thick, of 6" riprap on geotextile fabric will be placed at the downstream end of the emergency spillway. At the discharge of the principal spillway pipe a small area of the downstream slope above the pipe will be repaired and 40 square yards riprap on geotextile fabric will be placed at the outlet of the pipe for scour protection.

Project Location: At the YMO Lake Dam (formerly West Minister Lake Dam) approximately 400' north and 785' west of the Red Day Road and County Road 100 East intersection near Mooresville

Application #: FW-30807-0

Waterbody: West Fork White River

Applicant: Citizens Energy Group, Ed Malone, 2150 Dr. Martin Luther King Jr. Street, Indianapolis, IN, 46202

Received Date: 11/18/2020

County: Marion

Project Description: A rock ramp approximately 400' in length at the thalweg and left bank, 500' in length at the right bank, and seven (7) weirs will be constructed. The river width at the project site is 380'. Base stone materials would be approximately 6" o 30" in diameter with the weir stones being approximately 5' in diameter and spaced to allow fish passage. The gradation varies with the smaller diameter base stones placed below the weir stones to control the stream grade and prevent erosion or undercutting of the structure. The rock ramp will be designed with a portage to provide canoeists/kayakers a safe passage around the structure. The slope of the rock ramp prevents dangerous hydraulic rollers from forming on the downstream end. The rock ramp design would be for a "no-rise" condition and would not raise water surface elevation above the previous water surface elevations set by the Emrichsville Dam. Riprap will be placed for bank stabilization to ensure the integrity of the river is maintained.

Project Location: Beginning approximately 500' south of the Indy Parks Boat Launch in Riverside Regional Park and continuing downstream for approximately 500' at Indianapolis

Application #: FW-30823-0

Waterbody: Little Raccoon Creek

Applicant: Vermillion County Commissioners, Les Zimmerman, PO Box 90, , Newport, IN, 47966

Received Date: 12/2/2020

County: Vermillion

Project Description: An 8' wide stone recreational trail will be constructed along an abandoned railway bed as part of the Wabash River Heritage Trail project. The trail will connect to an existing trail and pedestrian bridge. The project will include wildlife habitat amenities, interpretive signage and a rest and picnic area. To access the area for construction, a temporary riprap ford will be installed at the end of a farm road. The haul road will cross through a forested wetland to access the rail bed. The wetland will be restored using a seed and tree mix. Additional mitigation will also be done at the site.

Project Location: Beginning at the South County Road 400 East stream crossing and continuing east along Little Raccoon Creek for approximately 970' to the west bank of the Wabash River near Hillsdale

Application #: FW-30839-0

Waterbody: East Fork Little Pigeon Creek

Applicant: CWK Investments - McCutchanville, LLC, Glen Meritt, 9210 Petersburg Road, , Evansville, IN, 47725

Received Date: 12/11/2020

County: Vanderburgh

Project Description: A new 300' wide by 725' long by 8' deep, storm water detention basin will be constructed. Material excavated from the basin will be used to elevate the building pads located in the floodplain.

Project Location: Beginning approximately 550' southwest of the intersection of Raphael Drive and Havenwood Meadows Drive and continuing approximately 750' south near Evansville

Application #: FW-30850-0

Waterbody: East Fork White River

Applicant: Indiana Department of Transportation, Jenni Curry, 100 North Senate Avenue N642-ES, Indianapolis, IN, 46204

Received Date: 12/18/2020

County: Jackson

Project Description: The existing triple corrugated metal pipe will be removed and replaced (Des #1700113). The existing structure is 60' long with a span length of 16' and a 0 degree skew. Each of the corrugated pipes has a diameter of 3.5'. The new structure will be a reinforced concrete box with headwalls and wingwalls with dimensions of 64' long by 5' high with a 16' span and a 1 degree skew right. The structure will be sumped 15". Riprap will be installed approximately 1.5' deep on top of geotextile fabric at the inlet and outlet of the structure for scour protection. Permanent impacts will total 0.044 acres. There will be 0.04 acres of non-wetland floodway trees cleared. Temporary impacts will total 0.005 acres for the use of dewatering equipment and cofferdams. Temporary impacts will be in place for approximately 1 month and will be removed and restored to pre-construction conditions at the end of construction.

Project Location: Beginning approximately 2,100' west of the intersection of County Road 575 West and State Road 235 and continuing approximately 400' west near Medora

Application #: FW-30856-0

Waterbody: Wade Creek

Applicant: Indiana Department of Transportation, Crystal Rehder, 100 North Senate Avenue Rm 758-ES, Indianapolis, IN, 46204

Received Date: 12/29/2020

County: Switzerland

Project Description: The existing structure will be rehabilitated which will include removing and replacing the existing concrete deck, concrete bridge railing, concrete end spans, and the reinforced concrete bridge approaches (Des.No: 1400024). Additional work will include placing new steel beams for the bridge end spans, installing riprap turnouts and placing scour protection around the piers and on the existing spill slopes. Total permanent impacts will be 0.1793 acres. Impacts will include, 0.0981 acres of non-wetland tree removal and 0.0143 acres of forested wetland with 0.0034 acres of tree removal. Temporary impacts include the use of access drives, dewatering equipment, cofferdams, causeways, construction entrances, and staging areas will be restored to pre-construction conditions at the end of construction.

Project Location: Beginning approximately 460' west of the intersection of Goose Creek Road and State Road 156 and continuing approximately 860' west near Patriot

Application #: FW-30868-0

Received Date: 12/2/2020

Received Date: 10/29/2020

Waterbody: Simonton Lake

County: Elkhart

Applicant: Mike Cheney, 25130 North Shore Drive, Elkhart, IN, 46514

Project Description: An existing steel seawall and wood dock will be removed and replaced with a new steel seawall along 60' of shoreline. The new steel seawall will tie in flush with neighboring steel seawalls on both sides.

Project Location: 25130 North Shore Drive near Elkhart

Application #: PL-24170-0

Received Date: 11/5/2020

Waterbody: Bass Lake

County: Starke

Applicant: Merlyn Lucas, 3167 South County Road 210, Knox, IN, 46534

Project Description: An existing concrete seawall will be refaced with concrete along 62' of shoreline.

Project Location: 3167 South County Road 210 near Knox

Application #: PL-24175-0

Received Date: 11/17/2020

Waterbody: Pine Lake

County: LaPorte

Applicant: City of La Porte, Mark Schreiber, 250 Pine Lake Avenue, La Porte, IN, 46350

Project Description: An area of a channel that is 20' by 30' will be dredged. Approximately 150 cubic yards of sand will be removed by dredging to a depth of 5' below the existing grade at the channel and 2'-3' below the existing grade along the shoreline. The excavated material will be transported to an upland area on City Park property for dewatering before being hauled to the City of La Porte Water Department for use in construction projects.

Project Location: 1126 Pine Lake Avenue at La Porte
